Iframe base64 javascript. Iframe base64 filename. Iframe base64 pdf internet explorer. Iframe base64 pdf chrome. Iframe srcdoc base64. Iframe base64 ie. How to display base64 encoded pdf in iframe.

The store will not work correctly in the case when cookies are disabled. * 171852 visibility 0 arrow_circle_up 0 arrow_circle_down I have a formatted PDF string that looks like %PDF-1.73 0 obj /Resources 2 0 R/Contents 4 0 R>> endobj4 0 obj streamx��R=o�0��+��=|vL�R���l�·

��¿_���Ge�JK���� {���Y5�����Z_k�vf�a�� G�┌��Asf�z�c�� '%��a!#�!;,�t���GD?!���startxref2015%%EOF

I am trying to open up this string in a new window as a PDF file. Whenever I use window.open() and write the string to the new tab it thinks that the text should be the contents of an HTML document. I want it to recognize that this is a PDF file. Any help is much appreciated 0 arrow_circle_up 0 arrow_circle_down Just for information, the below window.open("data:application/pdf," + encodeURI(pdfString)); does not work anymore in Chrome. Yesterday, I came across with the same issue and tried this solution, but did not work (it is 'Not allowed to navigate top frame to data URL'). You cannot open the data URL directly in a new window anymore. But, you can wrap it in iframe and make it open in a new window like below. =) let pdfWindow = window.open("") pdfWindow.document.write(" ") by * 0 arrow_circle_up 0 arrow_circle_down I just want to add with @Noby Fujioka's response, Edge will not support following window.open("data:application/pdf," + encodeURI(pdfString)); For Edge we need to convert it to blob and this is something like following //If Browser is Edge if (window.navigator && window.navigator.msSaveOrOpenBlob) { var byteCharacters = atob(); var byteNumbers = new Array(byteCharacters.length); for (var i = 0; i < byteCharacters.length; i++) { byteNumbers[i] = byteCharacters.charCodeAt(i); } var byteArray = new Uint8Array(byteNumbers); var blob = new Blob([byteArray], { type: 'application/pdf' }); window.navigator.msSaveOrOpenBlob(blob, "myreport.pdf"); } else { var pdfWindow = window.open("", '_blank'); pdfWindow.document.write(""); } by * 0 arrow_circle_up 0 arrow_circle_down Based off other old answers: escape() function is now deprecated, Use encodeURI() or encodeURIComponent() instead. Example that worked in my situation: window.open("data:application/pdf," + encodeURI(pdfString)); Happy Coding! * 0 arrow_circle_up 0 arrow_circle_down I had this problem working with a FedEx shipment request. I perform the request with AJAX. The response includes tracking #, cost, as well as pdf string containing the shipping label. Here's what I did: Add a form: Use javascript to populate the hidden field's value with the pdf string and post the form. Where getlabel.php: by * 0 arrow_circle_up 0 arrow_circle_down An updated version of answer by @Noby Fujioka: function showPdfInNewTab(base64Data, fileName) { let pdfWindow = window.open(""); pdfWindow.document.write(""); Thanks by * 0 arrow_circle_up 0 arrow_circle_down //for pdf view let pdfWindow = window.open(""); pdfWindow.document.write(""); by * 0 arrow_circle_up 0 arrow_circle_down One suggestion is that use a pdf library like PDFJS. You have to append, the following "data:application/pdf;base64" + your pdf String, and set the src of your element to that. Try with this example: var pdfsrc = "data:application/pdf;base64" + "67987yiujkhkyktgiyuyhjhgkhgyi...n" Hope it helps :) by * 0 arrow_circle_up 0 arrow_circle_down Just encode your formatted PDF string in base 64. Then you should do: $pdf = 'data:application/pdf;base64,'.$base64EncodedString; return this to javascript and open in a new window: window.open(return); by *
