Closes historical Compared to the closing of \$ 140.75 one week from 06/04/2021 (08/26/2021) N / A 1 month (06/08/2021) -4.80% 3 months (04/06/2021) 140.75 6 months (03/05/2021) 18.60% 1 year (02/09/2020) N / A 2 years (02/09/2019) N / A 3 years (09/02/2018) N / A 5 years (2016- 09-02) N / a is the waste management under or oversized? Assess the waste management value is incredibly difficult, and any metric must be seen as part of a general picture of the overall performance of waste management. However, analysts commonly use some key metrics to help evaluate the value of a warehouse. The price of the waste management waste management fee is divided by its earnings for shares (EPS) for a period of 12 months given a "price / final earnings" of approximately 41x. In other words, the waste management trade shares trade at about 41x recent gains. This is relatively high compared to, for example, the relative 12-month p / s ratio for the NASDAQ 100 at the end of 2019 (27.29). The high P / E report could mean that investors are optimistic about the prospects for actions or simply that they are oversized. The management of waste waste management waste management relationship of the ratio can be calculated by dividing its P / E with its growth A € - "to give 3.2261. A low ratio can be interpreted as meaning that actions offer a better value, while a higher ratio can be interpreted as meaning that the shares offer the worst value. the PEG ratio provides a wider view of only P / E, as it provides more information on the future profitability of the management of waste, by counting growth, could also help if you are comparing the prices of the shares of the most high-growth companies. EBITDA for the waste Management of waste Management of EBITDA (earnings before interest, taxes, and amortization) is \$ 4.8 billion. EBITDA is a measure of general waste management financial performance and is widely used to measure its profitability. TTM \$ 16.5 billion operating margin ottm 16.73% gross profit ottm \$ 5.9 billion return to ottm resources 6.58% yield on equity ttm 22.46% profit margin 9.69% book value \$ 17.47 Market capitalization \$ 65.4 billion TTM: Trailing 12 months Shorting Direct Shares management Currently 3.7 million waste management actions are held shortly by investors - known as "Brief Interest" of waste management. This figure is 23.1% compared to 3.0 million last month. There are some some Ways where you can evaluate this level of interest in short-term waste management actions. The "Interest report" of waste management waste (SIR) of waste management "Short Interest Ratio) is the quantity of currently intentional waste management quotas divided by the average amount of waste management shares negotiated daily (recently about 1.2 million). Waste management SIR is currently at 2.98. In other words, for every 100,000 waste management actions traded on the market, around 2980 shares are currently reduced. However, the brief interest of waste management can also be evaluated against the total number of waste management actions, or against the total number of negotiable waste management quotas (shares that are not held by "workers" or to the main shareholders A Long term A € a, - "also known as the" float "). In this case, the short waste management interest could be expressed as 0.01% of the shares in circulation (for every 100 000 existing waste management actions, about 10 shares are currently shortly reduced) or 0.0087% of the Negotiable actions (for every 100,000 waste management commercial actions, around 9 shares are currently short-kept). A similar ladies usually indicates an optimistic perspective for the price of waste management, with fewer people who are currently willing to bet against waste management. He finds out more about how you can short stock of waste management. The criteria set to the environment, social and governance of waste management are environmental, social and governance (known as ESG) are a set of three factors used to measure sustainability and social impact of companies such as waste management. When it comes to ESG scores, the lowest is better and the lowest scores are generally associated with a lower risk for aspiring investors. The total esg risk management risk score ESG risk: 10.59 Socially aware investors use ESG scores for the screen in which an investment aligns with their vision of the world and the total score of waste management of 10.59 (AL 12/31/12/2018) It is excellent - landing it in it in the fifth percentile of the companies evaluated in the same sector. The ESG scores are increasingly used to estimate the level of risk that a company as waste management is exposed within the areas of "environmental" (carbon footprint, use of resources, etc.), "Social" (Health and safety, human rights, etc.), and "governance" (anti-corruption, tax transparency, etc.). Environmental score of the environmental score of waste management: 3.19 / 100 Waste management Social rates Social rates Social rating: 3.11 / 100 Waste management Governance rates Governance rating: 0.22 / 100 Waste management power Score Score Score Rating: 2 / 5 ESG scores also evaluate any controversy incidences The company has been involved. Waste management marked a 2 out of 5 per controversy - the second highest score possible, which reflects waste management, for the most part, has managed to keep the nose clean. Waste Management Inc was the most recent for ESG: 2019-01-01. Total ESG 10.59 score Total ESG Percentile 5.48 Environmental score 3.19 Social score 3.11 Governance score 0.22 Polemic level 2 50% Dividend Payment report: 49.89% of net profits Recently waste management paid, on average, about 49, 89% of dividends as dividends. This allowed analysts to estimate an "annual yield forward of the dividends" of 1.48% of the current share value. This means that over a year, based on Payments (which are not sadly guarantee of future payments), waste management shareholders could enjoy a 1.48% return on their actions, in the form of dividend payments. In the case of waste management, which currently would amount to around \$ 2.24 per share. While the payment report of waste management may seem standard enough, it is worth remembering that waste management could invest much more than the rest of its net profits in future growth. The most recent payment of the waste management dividend was 16 September 2021. The last dividend was paid to all shareholders who bought their actions by 1st September 2021 (the "Data Ex-dividend "). Break up the volatility of the shares over the last 12 months, the actions of management waste have ranged from a minimum of \$ 104.3026 up to \$ 156.6. A popular way to evaluate the volatility of a stock is his "beta". WM.US Volatility (BETA: 0.81) AVG. Volatility (Beta: 1.00) Lowhighbeta is a measure of volatility of a share in relation to the market. Market beta (NYSE Media) is 1, while waste management is 0.8144. This would suggest that waste management actions are less volatile than average (for this exchange). Waste management Waste panoramic waste management, Inc. through its subsidiaries, provides environmental waste management services to residential, commercial, industrial and municipal customers in North America.
