XKeluar dari JalanTikusApakah anda yakin untuk meninggalkan website JalanTikus? The grand majority of Formula 1 games are focused on the most stunning side of this sport. In other words, the races and driving the cars, emulating Vettel, Hamilton, Raikkonen and company. But hardly any of them take a shot at what's behind the scenes of the Formula One World Championship regarding each team's management... and Motorsport Manager is precisely about this aspect. Manage your F1 team to the slightest detail in this PC version of the game (remember that there's a version for iOS and even an Android APK lying around somewhere waiting to be downloaded) you're going to be the Flavio Briatore of your home. And no, we're not talking about his hairstyle or the typical fake tan of an Italian playboy; we're talking about the fact that you'll be able to control everything that has to do with your team and, therefore, you're going to have to make plenty of decisions. Winning the world driver and/or constructor championship is up to you. As the team manager, you'll have to take care of every single aspect, from signing drivers to designing the car. Direct the races and take the right decisions to be carried out by your drivers. Customize every single aspect of the car's performance. Sign the best drivers and surround yourself by the best team of mechanics, engineers and directors. Study the circuits and design your strategies for each Grand Prix. Unfortunately, it's not supported by the FIA, otherwise, we'd be talking about the ultimate car racing manager. To get hold of it just click on the download button and you'll be redirected to Steam.
