Usually, that means trying a new sex position, using sex toys, or doing it in your in-laws' rec room while you're staying over for the weekend—but it could also mean playing a “sex game.” Yes, I know sex games sound tacky and ridiculous, but they're also a ton of fun. Not to mention they're a great way to physically and emotionally connect with your partner (or the adventurous friends you're playing with). The thing is, you have to be fully committed. You can't shy away from doing what the dice or cards are telling you to do. You need to suck those nipples, share your kinkiest fantasy, or whatever the hell else the game commands.Even if you're not someone who's super into learning new games, several sex games are sexy spins on old classics—think an even more sexual version of Truth Or Dare and kinky Monopoly. So really, you don't have to learn anything “new.”Now there are numerous off-brand sex games that pop up when you google “Sex games,” so we reached out to sexperts and sex therapists for recommendations. They made it clear that these games range from moderately erotic to highly sexual, so prepare yourself. Lastly, remember to have fun. Oh, and make sure not to leave the games out where the kids can see them. The Desire app (free on the App and Google Play stores) is a great way for couples to bond and experiment. The app allows couples to suggest different “dares” to each other (i.e. “I dare you to wear sexy lingerie”) from afar. “The Desire app can help people get past the communication barrier because it can help take the pressure off instant face-to-face communication. Likewise, by suggesting different dares, the couples can also explore their boundaries safely and add to their sexual repertoire,” says sex and relationship counselor Erin Chen. “Tools like this are helpful for couples who want to add more spark to their sex life but are not sure how.” Chronicle Books Position of the Day Playing Cards Kheper Games 50 Positions Of Bondage Game Creative Conceptions The Path to Pleasure Game
