DEMO | Do not download the fifth and current version of Hypertext HTML5 label language (hypertext marking language) filename .html, .htminternet media text / htm1type codetertextuniform type Identifier it (ICU) Public.html [1] Developed Á € " s ", January 1, 2008 (13 years ago) (2008-01-22) [2] Type of formatmarkup LanguStandardHtml Isopen format? Yes html dynamic html html html video xhtml profile c-html c-html element html span and div attribute html frame html document document document document document model browser model style sheets css family web colors javascript webgl webcl w3c valid Whatwg Quirks Mode Storage Web Render Motor Comparisons Document Tagging Comparations Languages HTML XHTML 1.1 HTML5 support is a labeling language used to structure and display content World Wide Web. It's the fifth and last [3] main html version that is a recommendation from the World Wide Web Consortium (W3C). The current specification is known as the HTML life pattern. It is maintained by the HyperText (Whatwg) Web Application Technology Working Group, a Browser Suppliers (Apple, Google, Mozilla and Microsoft). HTML5 was launched for the first time in a public shape on January 22, 2008, [2] with a large update and recommendation status "W3C" in October 2014. [4] [5] Your goals have improved the language supported for the most recent multimity and other new resources; To maintain the language easily legible by humans and consistently understood by computers and devices such as web browsers, analyzers, etc., without XHTML rigidity; and remain compatible with the oldest software. HTML5 is intended to subsuminate not only HTML2, but also XHTML á, and 2 HTML. [6] HTML5 includes detailed processing models to encourage the most interoperable deployments; It extends, improves and rationalizes the available markup for documents and introduces markup and application program interfaces (APIs) for complex web applications. [7] By the same way, HTML5 is also a candidate for cross-platform mobile applications as it includes features designed with low-powered devices in mind. Many new syntactic features are included. To include and deal with the multimount and graph content, the new elements, and and support for content of scalable vector graphics - á €
