Data Warehousing Mining & Business Intelligence   QP Code : MV-20069

IT7 / May-2014   (3 Hours)   [Total Marks : 100

N. B. (1) Question no. 1 compulsory.
     (2) Answer any four out of the remaining questions.

Q.1 Attempt   20
   a) What are major issues in data mining?
   b) Explain different OLAP operations.
   c) Difference between database and data warehouse.
   d) Write a short note on Linear regression.

Q.2 a) Explain constraint based and multilevel association rules with an example.   10
    b) Explain market basket analysis and uses of it.   10

Q.3 a) Explain BIRCH method of clustering with an example.   10
    b) Explain Regression. Write short note on Non-linear regression.   10
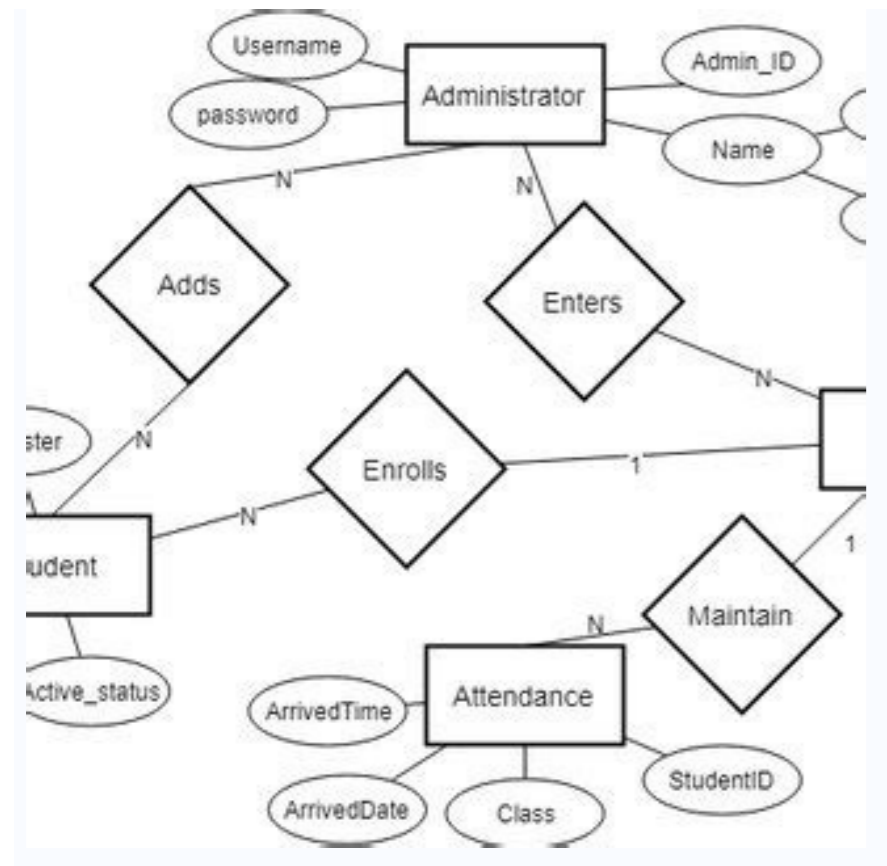

Q.4 a) Explain data cleaning, data transformation and Integration with an example.   10
    b) Apply Bayesian classification to predict class of new tuple
       (Nicol, Female, 1.67m). Use the following data.   10

Person ID	Name	Gender	Height	Class
1	Kristina	Female	1.6 m	Short
2	Jim	Male	2 m	Tall
3	Maggie	Female	1.9 m	Medium
4	Martha	Female	1.85 m	Medium
5	John	Male	2.8 m	Tall
6	Bob	Male	1.7 m	Short
7	Clinton	Male	1.8 m	Medium
8	Nyssa	Female	1.6 m	Short
9	Kathy	Female	1.65 m	Short

Q.5 a) What are outlier. Explain outlier analysis.   10
    b) Explain K-means clustering and solve the following with k=3   10
       {2,3,6,8,9,12,15,18,22}

Q.6 a) Explain Business Intelligence issues.   10
    b) Describe the steps involved in data mining when viewed as a process of
       Knowledge discovery.   10

Q.7 Short note on any **Three**   20
    a) Application of Web Mining
    b) Market segmentation
    c) Sequence Mining in transaction
    d) Agglomerative clustering.

Online advertisement management system project pdf.

INFORMATIC PROJECT Themes and research materials PDF and DOC free download with software and source codes for undergraduate students and last-year thesis 2021 to 2022 academic session. Bachelor and thesis students in the Informatic Department can obtain free project science project issues with abstract PDF and full MS-Word materials on this chapter 1 to 5 website with the references. Final year CSE students wishing to qualify for the National Diploma (ND), Higher National Diploma (HND), Bachelor of Science (BSC), Master of Science (MSC) and Ph.D. (Doctor in Philosophy) You can download already developed software and codes of origin for your projects. Edustore is a platform for an academic academic research repository and we have helped many students from all over the world with their work of information and source code development. FREE INFORMATION PROJECTS PDF For last year students in our research file, we have creative themes of creative information projects pdf and premium research documents in networks, web design and developments, mobile applications , Mining, Systems, Mini-Projects, and also, Themes and Magazines of Research Seminar Related for Last Students in the Informatic Department. Below is a list of the best themes of project projects and materials PDF documents download for students who acquire a national diploma title (ND 2), Higher National Diploma (HND 2), and Bachilier of Ciecets (BSC). Masters and Ph.D. Students can also get their best thesis ideas and dissertation publications related to informatics. In addition, we decided to list free themes of information projects with premium research materials for last year-old students You can choose your topics below this page and send them to your supervisor for approval. After approval, you can re-download the complete draft material of the approved themes instantly. Read more â¡ 'Click here to see all Content of the Project of Computer Science PDF Document on this website has its full material of chapters 1-5 and each publication comes with PHP, Java, HTML, source code CSS, or software. All the topics of the information project that are listed below have their source codes attached to their material. If you want to download a copy of our chapter 1-5 Information publication, we would like to let you know that our project material documents of any topic come with: Samples of proposals: The title page with the case study , Content Table and Abstract Chapter One: Introduction, The Fund of the Study, The Declaration of the Problem, The Research Questions, The Objectives of the Study, The Hydothesis of Investigation, The Signage of the Study, The Scope of the Study , The Definition of TÃ Terms, study organization Chapter two: review of literature, theoretical framework, conceptual framework Chapter Three: Methodology, Factory of Acts, Analysis of the existing system, Design of Systems, Objectives of the proposed system design, Factors considered in the proposed system, architectural design of the proposed system, design of proposed system databases, database specification, R Functional Equisits, Proposed System Modeling, Use Case Diagram, System Activity Diagram, Programming Language Election Four: Implementation and Results, Language Selection, Hardware and Software Requirements, Summary Communication Interface, Conclusions and recommendation, summary, conclusion, recommendation, references and appliances Read moreâ € œThe informal students can use these ideas from free project issues listed in this Website with a case study for your of academic research. Below is a list of the best interesting topic of the computer sciences projectFor students of the last year project taking computer courses in Nigeria, Ghana, Cameroon, Kenya, India, Turkey, Zambia and other countries in Asia, Africa and Europe. List of topics for free computer projects Topics and research materials PDF 2021/2022 An online ubiquitous system to evaluate user self-efficacy and anxiety in distance learning A smart system to combat the impact of the crime/terrorism of the database on the performance of the organization in a design and implementation of the computerized personal payroll information system industry Design and implementation of the computerized menu menu menu menu menu menu menu of the restaurant Design and implementation of the computer registration application for the design and implementation of the implementation of the computerized pricing registration The design of the system and the implementation of the Coronavirus tracking system for infected patience the effect of the Java network on the communication system in the communication system in the communication system. Nigeria design and implementation of an automatic street lighting system using IOT Identification websites Detection using machine learning the impact of mobile phone self-efficacy and computer anxiety on the attitude of students from distance to online courses, digital marketing is effective for OL in achieving business expansion in COVID-19 Design and implementation of the Population Census Information System by computer. Design and implementation of the commercial vehicle registration system and task management system in a campus design and implementation of the campus wide wireless network design of a smart homein IOT using the design and implementation of Amazon Alexa's information system. Design and implementation of the automatic payment portal system (A case study by the University of Ahmadu Bello, Zaria, Kongo Campus) Design and implementation of the medical registry system of automated patients (a case study by Delhatu Specialist Hospital, Lafia) Design and implementation of the automated design of the NYSC publishing systemImplementation of the automatic design of the driving system of the motorized vehicle and the implementation of the Automated Design and implementation of the system of administration and administration of properties (electronic property) of the property and the system of identification of a number of vehicles and plates online in the design of Nigeria and implementation of an online system for the national flight client Design of the system of legal management of the information and the implementation of a system of study and follow-up of parcels in real time Design and implementation of an online library with electronic payment integration (a case Study of the University of Madonna Nigeria Book Shop) Design and implementation of an online library management system (a case study by the Kano Public Library in Nigeria (KPL)) Design and implementation of an online birth registration and monitoring of the birth rate of the system registry system and the implementation of an online auction and bid system Design and implementation of an online airline reservation information system design and implementation and implementation of a multi-purpose design and implementation of the workflow management system and the online academic workflow based on a design of the NYSS information system StudyCase of Dangote Group of Company, Ilorin) Design and implementation of an expert system in the diagnosis of communicable diseases Design and implementation of an expert management system for the design of car failure detection and the implementation of an electronic information system management of patients. (A case study of Shonahan Hospital, Nsukka Enugu) Design and and Of an electronic registration system in the tertiary institutions designed implementation of an automated student results processing system (a case study of the Informatic Department, Kogi State PolitÃ © nico, Lokoja) Implementation of An automated namine system A Case Study of Nigerian Communications Commission (NCC) Corporate Headquarters Maitamama, Abuja Design and Implementation of an automated Inventory Control System for Breweries PLC of Nigeria, Diseño de Enugu and implementation of an academic information system using the Sterna Relational and HTTP database (a case study of Federal PolitÃ © NEKEE. ETERRI) Design Implementation of Pharmacy Inventory Applications Design based on the Alarm and the implementation of the flight information system of the AÃ © nica (A Case Study of Air Nigeria, Lakes State). Design and implementation of a designer and implementation of an automated calculator calculator of qualifying students (GPA). A Web-based health information system for diagnostic design of malaria and implementation of an implementation of the Web-based e-post management system of a database management system of Students based on the Web (a case study of the students' association of the University of Ninamdi Azikiwe) Implementation of A Web-based voting registration system (a case study of INEC Lagos) Design implementation of a Virtual Electronic Learning System (a case study of the University of Lagos University) and the implementation of a web application based on social networks for future college students (a case study of the University of Pact) and the implementation of a security information system (a case study of the Nigerian police design and the implementation of a system of the system of of recruitment and the implementation of a designer of the police officer of the police and the implementation of a management information system for political parties. Design and implementation of a digital museum designer and the implementation of a digital journal. Design and implementation of a Departmental Portal (Informatic Case Study. Informatic. Computer-driven design and implementation of a computer-based design And the implementation of a collaborative and file management system for mobile applications Design and implementation of online registration portal (A case of study by Hassan Usman Katsina Polytechnic) Design and implementation of an automated student registration system (A case of study of the Polytechnic Ibadan) Design and implementation of a computerized system to share files and access control Design and implementation of medical diagnosisExpert systems Data mining Computer Management (A Case Study of the University of Kwara Polytechnic, Ilorin) Network Information on the Application of Insurance Services Management System of the Piggery Management System of Computed transcription management (A Case Study of the University of Caritas) Computerized Crime Tracking Information System (Nigeria Police Case) Plate Cleaning System in Nigeria (A Case Study of Bank Access in Nigeria) Automation of the Student Information Management System (A Case of Study of International Tolfun Schools) Automation of Binomial Expansion by Applying the Pressure Triangle of the Virtual Private Network (Vpn) Application of Charge Therapies in the Reduction of PrisonersStudying SystemsMobile Java-Based Tutorial And System Certification Design And Implementation Of A Computer-Based Computer Management system (a case study of guarantee of Fideicomiso Banco PLC) Design and implementation of a user application software of a computer-based inventory system for asset management Practice design and implementation of the automation of the system generation of schedules of the design of the student's information management system and implementation of the design of the student's information system. Execution of the design of the search engine system and implementation of the design of the patient diagnostic system and implementation of the mobile application for the design and implementation of the medical design implementation medical experts. The information system for the design of hospital management and the implementation of the design of the application of online radio transmission and the implementation of a computerized game (a LUDO GAME case study) Departmental results. Application Processing Application Computer-Based Exam Action for Computer Recruitment Animation Staff for Kindergarten Students (a case study of Lizbey Model School) Adaptive Quiz System (a case study of higher schools) Effects of the allocation of computer-assisted concepts and digital video instruction in the achievement of students in chemistry design and student implementation. Design and implementation of the verification system of the computerized documentation system for court proceedings (a case study of the Federal Court of Calabar) and the implementation of a computerized information system for visa processing (a case study of the British Embassy) Design and implementation of a computerized case programming system. The Court of Jusw (a State-of-the-State case study of the IMO High Court) and the development of a of diagnostic experts for kidney diseases, the design and the implementation of the design system of the project defense system and the implementation of a line of online medical billing system and the implementation of cryptosystem of digital images with adaptive adaptive Steganography line controllers Registration system and implementation of the online diagnostic system for the implementation of the data management system and the implementation of the online data management systemComputer systems design and implementation of an online software file management system and software file design in the online software file management system and implementation of an electronic data processing system Design and implementation of a certificate verification system An evaluation system for academic employees Design, implementation and simulation of prepaid counter, theft monitoring system with alert design and implementation of a fingerprint-based assistance management system for tertiary institutions Design and implementation of an average student score system Design and implementation of a computerized tourism booking system Design and application of a multi-media e-learning systemCollaborative Learning Design and Implementation of Cybermetic Safety (A Case Study of Access Point Communication Limited Umuahia) Design Implementation of a Web-based Hall Assignment System for the Exam (A Case Study of Nau, Faculty of Physical Sciences) Design Implementation of a Social Network Web Site for Personnel and Students The degree of Information System Availability and its Accessories for Effective Teaching and Learning Science Sciences in Higher Secondary (Case Study From Enugu North LGA) Implementation of computerized library management system (an Anambra State College of Agriculture Library case study) design implementation of a computerized hotel check-in system. (A Case Study of Modotel Hotel Limited Enugu) Evaluation of programming skills possessed by an education science education student for self-employment in Anambra State a framework for the National Integration of BiomÃ © Trica Mutual Exclusion Group in Opportunistic Network A Multimedia Learning System for Selected Subjects of Fabric Application of the System Application System Application System (A Case Study of Abia State Poly Technic, ABA) A web application for news around the School Formal Verification of a Network in Chip Formal Analysis of DDML Determinants of Influence in Literacy and Culture: A case study of secondary schools in Yola, Adamawa State, Nigeria The impact of auto banking service technology quality in the satisfaction of the Client: A banking bank banking bank of Nigeria Banking System of Management B ASE Data Tourism Sector Using Data Warehouse Approach Breast Cancer Classification Using Logistics Back An Eclipse Based Graphic Modeling Tool for Discrete Event Simulation Intranet-Based Wiki Instant Messaging Protocol Electronic Stamp Payment System Data Classification Using Various Learning Algorithms Genetic Algorithms For Timetable Generation Evaluation of the Systems Success in Nigeria An application of the Success Model of Information Systems by Delono and McLean Study of the scalable neural network for the recognition of wildlife animals. Comparison of mining analysis / identification system of academic results promotion of GSM. Smartbin Application Services: Internet-based efficient waste management. Of Things (IOT) Results Cycle system in higher institutions using PHP, HTML, CSS, MySQL.HTM Cancer-based image analysis system for cervical cancer detection Web search results Annotation of results Intelligent multimedia learning system for the theory Automata A Real-Time Data Flow Processing Model for A Smart City Application Take advantage of the Intelligent Internet of Things (IOT) Concept Observation System for Road Accident Monitoring in Nigeria Comparative Study of Annotation Tools and Techniques Data classification using the management system 3n of knowledge of hierarchical clusters. Adoption at the American University of Nigeria. Design and evaluation of chip adaptive network systems for the design and simulation study of multi-core architectures of a scalable and resilient network architecture for a hybrid cloud; Your billing system A Tesis Trust Aware recommendation system for social coding platforms (GitHub case study) Multinational specification generation system that employs probability matching algorithms for identity management in the telecommunications industry. Verification with statistical models of shape and appearance Wireless sensor networks for environmental monitoring applications A Fuzzy-based approach to modeling user preferences in Multi-Criteria Referral Systems Study of hardware emulation of processing in the crust for pattern recognition An implementation of the system of recommendations based on smart means of the new solution of fault tolerance in wireless sensor networks in a context of multiple channels in big data Management on the internet of things that appear in neural network architecture design and performance performance performance Towards the design of a scalable system Neuroinspirated for complex cognition applications automated fish feeder using Internet of Things (IoT) Intelligent tutoring system to learn programming oriented programming language Genuine animation tool for traffic simulation ± ORE Implementation of Disaster Report Management Systems (A Case Study Implementation of Sok Photo International Journal of Counselling Psychology). A Hybridized Recommendation System On Movie Data Using Content-based and Collaborative Filtering Programs To Access System Resources A Review of Dimensionity Reduction Methods and Their Applications Enhancing Prediction Precuracy of A Multi-Criteria Recommender System Using Adaptive Genetic Algorithm Business Educatorsâ ¢ â € ² â³ Rating of Techniques for Improving The Teaching of Information and Technology of Communication in Tertiary Institutions in Anambra State Approach to A Simulation Virtual Machine: Object Oriented Implementation of CDEVS and PDEVS Applying Deep Learning Method for Handics of Short Texts in Control of Diseases A model View Controller Based Platform for Modeling and Simulation of The Hoist Scheduling Problem The implications of ICT on Voting Behavior in Nigeria. A study case of the State of Born (2015Ã ¢ à) à) comparison of the academic performance of student in informal in the tertiary institution since 2016-2019 Implementation of an intelligent control system of TRA FICO Development of a University Document Management System Design Implementation of Electronic Notebooks for Industrial Students Work Experience Scheme (SIWES). Evaluate the use of the computer in the teaching and learning of BOMIC SCHOOL TECHNOLOGY in Orumba Sur Local Government Area of Anambra State Design and Implementation of a Peer to Peer Network for File Sharing Design and Implementation of E-Learning Platforms For. Introduction to C++ Programming Language Design and Implementation Of Digital Cash Cash System Design and Implementation of Course Register and Results Processing System (Case Study of Federal Polytechnic, Ilaro) Design of Computerized Internet Cafe Timer and Monitoring Design Computerized Hotel Front Office Gestion System of computerized hosting manager Information implementation of the visitors' Information Monitoring System Design Computerized Care Implementation of Care Information Customer Information of Children's Quantity System For Engineering Project Design and Implementation of Computerized Tourism Information System (Case Study of Owerri in IMO State) Enhancing Prediction Precuracy Of A Multi-Criteria Recommend System Using Adaptive Genetic Algorithm Business Educators Rating of Techniques for Improving The Teaching Techniquion In Terciary Institutions Approach To Simulatio n Virtual Chisel: implementations OOP CDEV And Pdevs Applying all MÃ © Deep Learning For Short Text Analysis For Disease Control Platform A Model-View-Controller-Based Modeling and Simulation Programming From Problem Hoist Evaluate the use of Computer Teaching and Learning of Baby Technology in Secondary School La Escuela de la Escuela de la Escuela Computer animation for Nursery Pere students (Case Study of Lizbey Model School) Assisted learning of subject matter Basic science. (Case Study of SS1 Class) Automated Time Table to Generate Package (Case Study of Computer Science Department, Kwara State Polytechnic, Ilorin) A model of an admission admission system for Universities of Federal Unit Top 10 Themes From the Project of Información Sciences 2022 Hiring a Homemary Research Writer Dedicated Professional Project Writers with AÃ ± Os Experience in research writing with years in research writing, ready for research writing, help you and guide you through your research project in Computing Sciences Works and guides, presentations of seminars, magazines, essays, articles , articles, Papers, books, research papers, proposals and assignments at any level of undergraduate and polytechnic. We offer the best research writing, data analysis services. This service is for senior students who have a new topic of computer projects that is senior their supervisor and could not find it on this website, and also for students who are busy or do not have time to write. We have well-trained professional writers who will write according to your theme, reliable and reliable. Feel free to get in touch with our team to help and guide you. â¢ Contact us now If you are interested in hiring us >> Hire a software developer or programmer This service is for busy students or do not know how to code or develop software for your project topic, rest assured that you can Trust us with the software development of end-year computer projects. We have the most trained software developers and programmers on our team. We are reliable and we trust. Feel free to get in touch with our team to help and guide you. âÅ" Rent a Software Developer Now Å"How to Download Computer Science Project PDF Materials Interested in getting some complete computer material? Please refer to our payment instructions for more information on how to make the payment and download your complete IT project project, from Chapters 1-5 with references and specifications and source codes. In conclusion, all of the above topics of the Computer Sciences project are recent topics of 2019, 2020 and 2021. and its materials are ready for instant download in PDF and MS Word format. In conclusion, we have listed on the following: Best Computer Science Project Top 10 Projects in Computer Science ND Computer Sciences Project Topics HND 2 Computer Sciences Project Topics BSCÃ Computer Sciences Project Topics MSC Computer Sciences Project topics for the last year Whatever degree you are acquiring at any school, we have listed above, computer project topics with with withResearch materials Download PDF documents for final year students. Good luck defending your project. draft.
