I sure do, and a couple of months ago, that's precisely what happened to me. I came home from a tiring day at work to a house that was freezing cold. It turns out the heating system had stopped working sometime during the day because something went wrong with the thermostat.Even though the fix itself was quick and easy, finding out what it was took a while. It took me hours to find the proper way to return my White-Rodgers thermostat system to its original factory settings. Since I was not sure what model my thermostat system was, it took me even longer.Hence, to save you the hassle of going through all the material on the internet in attempts to find the proper method of rebooting your heating system, I have compiled this list of the most common White-Rodgers Thermostats and methods of resetting them.The most common method of resetting the White-Rodgers Thermostat is by pressing down on the Up or Down arrow and the Time button at the same time until the display goes blank on your White-Rodgers Thermostat. This usually takes 15 seconds. However, to make this work, ensure that the White-Rodgers thermostat is turned on.Find the Model number of your White-Rodgers ThermostatThe factory reset instruction of each thermostat depends on the type of thermostat and the model number. For example, the Classic 80 & 70 Series White Rodgers Thermostat requires you to press down on multiple buttons at the same time to factory reset it, while you can access the reset options on the Sensi Touch Smart Thermostat through the menu.Hence, to ensure that you reset your thermostat correctly, ideally, you should have its model number. In most cases, the model number is mentioned on the backside of the cover plate. Simply pull out the cover to read the text printed on it. It is very much similar to pulling out the battery casing on a TV remote. Note that some wiring may be exposed as you remove the plate. Be Careful! You can also find the model number in the user manual or the box the thermostat came in if you still have them lying around.How to Reset the Classic 80 & 70 Series White Rodgers ThermostatThis is the most common type of White-Rodgers Thermostat found in most houses. Its reset procedure is also straightforward.Factory Reset (Procedure #1)For this method to work, make sure your system is turned on.Long press the Up or Down arrow and the Time button together.Keep pressing until the display goes blank and then comes back alive. This might take 15 seconds.The configurations have now been reset. Don't forget to re-program your schedule.Factory Reset (Procedure #2)Suppose the first method does not work for you. Try this one out.While long-pressing the Up or Down arrow, switch the system from 'Off' to 'Heat'.The screen should immediately go blank and reappear.The configurations settings have now been reset.How to Reset Sensi Touch Smart ThermostatThe Sensi Touch Smart Thermostat is one of the latest models by the company. As the name suggests, it comes with Wi-Fi and is compatible with smart assistants. Hence, the resetting process is relatively simple and easy to understand.Factory ResetThis method will take your system back to the way it was when it came from the factory. All the existing Wi-Fi connections, smart home hub pairings and other configurations will be deleted.Go to Menu.Select 'about thermostat'.Select 'Factory Reset'.It will take a few seconds, and you will be redirected to the main page.Schedule ResetIf you want to reset the already set schedule system, follow these steps.Go to Menu.Select Schedule. Make sure it is on.Edit the configuration settings. This will rewrite any previously saved settings.Click on Save.Note that you can also use the Sensi App to reset the schedule.Wi-Fi ResetThis varies based on whether you have installed the Sensi App on an Android device or an iOS device.For an iOS device, follow these instructions:Go to the menu and select connect (Note that if you don't see the connect option, either change the batteries or reset your thermostat).The display will either show '00', '11', or '22'.In case you see '11' or '22', go to the Sensi app, and scroll down to the 'Set up a new device' tab. Tap next and follow the instructions. (Note that you should be connected to a 2.5 GHz network).In case the screen displays '00', go to the Sensi app and select the '+' option on the top left.Select 'Yes, it is on the wall.' (Meanwhile, the Wi-Fi icon should be flashing on the thermostat display.) The app will lead you through the process of reconnecting your thermostat to the Wi-Fi.To reconnect your Sensi thermostat to the Wi-Fi using an Android device, go through these steps:Go to the Sensi app and select the '+' option on the top left.Select 'Yes, it is on the wall.' (Meanwhile, the Wi-Fi icon should be flashing on the thermostat display.) The app will lead you through the process of reconnecting your thermostat to the Wi-Fi.The app may ask you for a Security Code/PIN. You can find it on a black card that comes with the packaging. You can also find it on the thermostat faceplate.How to Reset Sensi Smart ThermostatThis smart thermostat is found in many newly built houses. Like its Sensi counterpart, it also comes with support for AI assistants.Schedule ResetGo to Menu.Select Schedule. Make sure it is on.Edit the configuration settings. This will rewrite any previously saved settings.Click on Save.Note that you can also use the Sensi App to reset the schedule.Wi-Fi ResetThis varies based on whether you have installed the Sensi App on an Android device or an iOS device.For an iOS device, follow these instructions:Go to the menu and select connect (Note that if you don't see the connect option, either change the batteries or reset your thermostat).The display will either show '00', '11', or '22'.In case you see '11' or '22', go to the Sensi app, and scroll down to the 'Set up a new device' tab. Tap next and follow the instructions. (Note that you should be connected to a 2.5 GHz network).In case the screen displays '00', go to the Sensi app and select the '+' option on the top left.Select 'Yes, it is on the wall.' (Meanwhile, the Wi-Fi icon should be flashing on the thermostat display.) The app will lead you through the process of reconnecting your thermostat to the Wi-Fi.To reconnect your Sensi thermostat to the Wi-Fi using an Android device, go through these steps:Go to the Sensi app and select the '+' option on the top left.Select 'Yes, it is on the wall.' (Meanwhile, the Wi-Fi icon should be flashing on the thermostat display.) The app will lead you through the process of reconnecting your thermostat to the Wi-Fi.The app may ask you for a Security Code/PIN. It is written on a black card that comes with the packaging. It is also written on the thermostat faceplate.How to Reset 80 Series Emerson ThermostatThis is a relatively small thermostat system that you'd find in apartments and small houses.Factory ResetLong press the 'Backlight' and the 'Menu' button at the same time.The display will go blank and reappear. This might take a few seconds.The configurations have been reset.Hard ResetIf the display is stuck or is non-responsive, your first step should be replacing the batteries. If it still does not work, perform a hard reset.Replace the cover plate.Remove the batteries and wait for two minutes.The system should be alive. If it is still stuck, there might be a hardware issue. Seek professional help.How to Reset Blue Series 12' Emerson Touchscreen ThermostatThis is another very popular thermostat system that is found in many houses.Hold ResetSometimes thermostats, while running a schedule, can be stuck in a permanent hold. This does not mean it has a bug or the software is faulty. All you have to do is go to the menu and press 'Run Schedule'. The hold will be removed, and the system will start functioning like before.Hard ResetIn case you cannot operate your Blue Series 12' Emerson Touchscreen Thermostat or if the screen is stuck, perform a hard reset by following these steps:Replace the cover plate.Remove the batteries and wait for two minutes.The system should be alive. If it is still stuck, there might be a hardware issue. Seek professional help.How to Reset Blue Series 6' Emerson Touchscreen ThermostatSchedule & Configuration ResetHere is how you can reset a schedule programmed on the Blue Series 6' Emerson Touchscreen Thermostat:Long press the Up or Down arrow and the System or Fan button.Wait till the display goes blank. This might take a few seconds.After the display reappears, the schedule, clock and other settings will be reset.Hard ResetReplace the cover plate.Disconnect the R and C (or RH and RC) wires from the terminal. Please don't mix them while reconnecting, and don't let them touch.Remove the batteries and wait for two minutes.Replace the wires, batteries and cover plate.The system should be alive.
