Once every eighteen hours, a collection node have the possibility to provide you with a map. Botany and mining knots will provide you with a randomized quality map, while the fishing holes have fixed the votes connected to their position. If you don't want to follow the collection path, you will have to buy your favorite map from the market council in any important city. This in reality has some advantages in collecting them alone. You can buy the specific map you want, which means you are not subject to cruel RNG. And you can buy more than one a day - Take a map, solve it, go back to the market scoreboard, the process starts again. The obvious disadvantage of the purchase of the maps is the cost. The prices will vary according to the quality of the map and the economy of your world and can float daily. In general, the most recent maps that require a larger level of collection will be more expensive. Source image of U / Xlauncher / © Square Enix Co., Ltd. All rights reserved. From there you will only have to use your skill of deciphering on the map and indicate you in the right direction. The use of the decipher map make a window appear that aims at the position of the article. You will have to refer to doing it with your game map to track her down. Treasure maps start at level 40 with leather maps more tempoworn. These are the most common maps and offer a minimum treasure at the end of the hunt. They followed a goat skin, which are oriented towards level 45 players and offer significantly better rewards. Each expansion also has its own series of treasure maps, with the difficulty of sprouting with increases of five levels. Instead of breaking down them in a list, he only shouted those who offer unique opportunities: Heavensward has 06 06 ollevil id etelpmoc etsef el rep etattegorp onos niksogard eppam eL .airenottoihg e snrevyw id ellep ,niksoehcra id And having the possibility of rewarding players with access to Aquapolis - a special example that requires a lot of luck to complete. After defeating the monsters and claimed loot, the part must open one of the two doors. One led them more deeply in the basement, the other warned them from the application. It is possible to access seven rooms in total, but how you are practically looking at one 50/50 every time you open a door, you will rarely see the end of Aquapolis. But you will keep the treasure you have acquired even if you do not reach the end - so it is not a waste of time or anything. Stormblood offers Gaganaskin, Gazelleskin and the thief map. The thief's map is the special one here, potentially granting access to Uznair's hidden channels. This is similar to Aquapolis, but we recommend a complete group of levels of level 70. This time the players will have a choice of three doors every time they want to proceed more in depth, further reducing their possibilities to see the end. The Mongle Treasure Treasure event can offer a more special map map. "This map provides a guaranteed portal to Uznair. Shadowbringers currently offers only two maps: Glideskin and Zonureskin. Glideskin recommends a level 80 solo player and Zonureskin is that Special here, which requires a complete party of the 80s. It has the possibility of granting a passage to the basement of Lyhe Ghia, which again works like those before. Lyhe Ghia is more small by Aquapolis and Uznair, with only five rooms . But if you are playing this hour, you will get premiums rather surprising. Source of U / Gramedyn / © Square Enix Co., Ltd. All rights reserved. The treasure coffers reward you with craftsmanship materials, furnishings for The house, tomers, servants and, of course, a little sweet money. Pi hard it's the map, the best are the prizes.
