Being is an auxiliary verb, which means that it is used to make other verbal times. But don't worry ... once you have learned how compound times are made, you will already be halfway. Let's see how to combine the being, and how it is used in common Italian phrases. The finished soul states of being there are four years of soul finished in Italian: indicative mood Consists of eight times, four simple and four-stroke compound times. It is used to express certainty that an action took place or happen. Simple Tenses present I am the am you are you / she / she are we are you don't have to add the subject to sentence when it is understood from the verb. You could get rid of you in the first example and the phrase would still be grammatically correct. Imperfect I was the wash you were you were they were the imperfect time is used when talking about a action that was taking place at the time of conversation, For example: the neighbors were you were they wer on vacation yesterday.) Remote past I was the Was you were you wer were stopped by the police that night.) Simple future I will be the will be you will be they will be the will be we will be they will b express doubts, give orders or provide an estimate. These ways to use the They are used only in the colloquial Composite times in theindicativ. To create them, all you have to do is use the simple conjugated form of BEING over the time you need and add the participle to it. Once you learn how to get married... BEING IN SEMPLICE TENSI, you will be able to easily build the following times. Next step I've been up to you You have been Him / Y versatile past, Next Step is used to indicate an action that happened and reached its conclusion in the past, compared to Imperfect, where the action was still happening at the time of talking. I'm up to church. (I was in church.) Yesterday We are States at the Museum yesterday.) Trapassed Next I Was State You Was You and I stayed at school in the morning, and we went home together). This tense is used to talk about an action or an event already performed in the past, which precedes another to which it is connected and which is expressed from a past time. Nowadays, it is only used very rarely. Trapassed Remoto I Fui State You Found State Him / She Was State / To Us Fummmo States You Found States They Furono States This tense has no English equivalent, and is rarely used in Italian. Like the Remote Step, we use this tense when we refer to events that happened long ago, which were then followed by another event, for example: After Anna Fu States They Furono States They Fur was at the accountant, she met Luca.) It is archaic and is gradually replaced by Next Step, so you will Be State You Wil Be States They Will Be States This tense is used when you want to talk about what will happen once the action will happen in the future, for example: After I'm in the bank, I'll visit Carlo to the hospital.) Notes: Three out of the four composite times are used only to describe events in relation to other events. They don't make sense in standalone phrases. Remoto Pass is the only compound that works alone. Being can be an auxiliary in itself, unlike English. The phrase that follows one with the tense compound must be in the corresponding simple tense. So, if you use remotely crossed, the following sentence must be remote in the past, and if you use future anterior, the following sentence must be in the future simple. Being - Conjugation in Subjunctive Mood Subjunctive Mood Subjunctive mood (conjunctive) is used to express subjectivity, uncertainty or doubt. It is used in subordinate clauses—clauses that cannot exist as a complete phrase because they do not express a complete thought—and always introduced by the word that (that). As the indication, it has simple and composite tensions. Let's see how to combine being in the subjunctive mood. Simple Tenses Present I am You are That I was (that I was that you were (that) you were That he/she was (that he/she was) That we were (which) they were I would like you to be here. (I wish you were the best.) Composite Tensions These are created by adding status to the corresponding aid. Passed That I was that you were That he/she has been/to Him/She has been That we have been You have been You have been That they were I think Marco and Giulia were here yesterday. (I think Marco and Giulia were here yesterday.) That I am That you were That he/she had been That we were That you w happened or has been realized, for example: you were at McDonald's in the country yesterday.) The word that can be omitted when the verb expresses doubt or uncertainty. It cannot be omitted when the will is expressed. Subjunctive mood has no conjugation in English. Being - Conjugation in Conditional Mood Conditional mood (conditional mood (conditional) is used to indicate an event that will only happen if a certain condition is satisfied. Below is the conjugation of being in the two tenses of conditional mood. Present I am You colleagues Him/She would be able to win, if you commit more. (You and Mario would be able to win, if you worked harder.) Passed I personally was you He/she would have been promoted if that incident didn't happen. The English language does not have conditional mood. To create hypothetical phrases, it instead uses conditional sentences. Note: The subordinated sentence of a conditional phrase is always in the subjunctive mood. Being A ¢ â, ¬ "Conjugation in imperative mood is used to give commands and orders. In English, it is made with the simple present. You / she / it is we are you are they are this mood It is not used at all outside the works of literature or films to add a dramatic effect to what he said, for example: that he was carried in prison. (Portala in prison.) The undefined moods of being these moods do not have a topic, from here the name is A ¢ â,¬ Å "indefinite". They are used in subordinate sentences, where you can understand the missing subject from the context. Present infinity spent having been soon passed passer Stotto Gerund passer passing being since known: the infinitive present is the basic form of the verb, so this is the form you are looking for when looking for a verb in a dictionary. Don't expect to see it anywhere. Stay on the other hand is all over conjugation. The Gerund is used to express the contemporarity, the above, causality or the contording of an action compared to another. Here is an example: being stoto gies times in Barcelona, three ¢ â,¬Â "¢ next year will go to a Madrid. (Having been in Barcelona three times, next year we go to Madrid.)
