Gigantamax Butterfree battle (Image credit: iMore)If you've gotten far enough in Pokémon Sword and Shield, you've probably already seen the phenomenon of Gigantamax Pokémon -- Dynamax Pokémon with unique, powerful appearances. These Pokémon don't come about just by simple Dynamaxing. Instead, there's a particular way to obtain these monsters for yourself, and it requires a lot of diligence and a lot of time in the Wild Area. Here's everything you need to know about Gigantamax in Pokémon Sword and Shield. Gigantamax Pokémon are a unique form of Dynamax Pokémon that are mostly the same in terms of stats, moves, and abilities, but with two main exceptions. The first is that their appearance when Dynamaxed is different from just a larger form of the Pokémon: Gigantamax Pokémon have unique visuals that are even more intimidating or awesome than usual Dynamax Pokémon. The second is that they gain a special "G-Max" move when Dynamaxed that normal Pokémon don't have. These Pokémon are incredibly powerful and can only be obtained by defeating and capturing them in Max Raid battles or, for a few specific Pokémon, through special gifts from NPCs. How do you find Gigantamax Pokémon? A Max Raid battle (Image credit: iMore)It can be challenging to track down Gigantamax Pokémon because there isn't really a clear designator of where they are or when they appear. From the outside, they look just like any other Max Raid, and you have to know what you're looking for to spot it in the Wild Area. Gigantamax battles look just like normal Max Raid battles on the outside. The "purple" beam of light emerging from a Pokémon den does not indicate a Gigantamax raid explicitly -- purple beams indicate rare encounters, not Gigantamax encounters. Rather, you have to go up to each raid and look at what's inside. Gigantamax raids will always be 5-star difficulties, and like Dynamax raids, you'll only get a silhouette and the typing of the Pokémon you're about to fight to go by. To spot Gigantamax battles, you'll have to both know what Pokémon you're looking for upfront (we've provided a full list below). You can also hop into Gigantamax raid battles with friends, just like you usually do with Max Raid battles. While connected online or locally, you should see a card appear when a friend or stranger enters a Max Raid battle. Like usual, you'll only have the silhouette and typing to tell whether or not the Pokémon you're about to fight is a Gigantamax Pokémon or just a regular Max Raid, so you'll have to do some discerning. A few Pokémon's Gigantamax forms can be obtained through special gifts from NPCs in the game, or through special events. They are: Charizard (Charmander found in Hop's house after beating the Elite Four) Pikachu/Eevee (Gift from trainers at the Meeting Spot if you have Let's Go Pikachu/Eevee save data on your Nintendo Switch) Meowth (Mystery Gift for early purchases of Pokémon Sword and Shield) How do I battle and capture Gigantamax Pokémon? Gigantamax Centiskorch battle (Image credit: iMore) Gigantamax Pokémon are considerably stronger than regular Max Raid Pokémon in most cases, and their G-Max moves can make things even trickier. Make sure you're going in with a powerful Pokémon (ideally level 60 or higher) that has a typing advantage and resistance against the Gigantamax Pokémon you're facing. It's also helpful to join up with friends to fight Gigantamax Pokémon. The game's NPC trainers that join you when you're alone are random and often bring weak or disadvantageous Pokémon to the battle. You don't want to be teamed up with the one who brought a Magikarp to a Gigantamax fight, so try to use the search function to pair up with other trainers or friends as often as possible. If I lose or fail to capture a Gigantamax Pokémon, can I try again? Gigantamax Butterfree lobby (Image credit: iMore) If you lose the battle by running out of turns or having too many Pokémon faint, you can try again as many times as you like until the raid disappears (which it will eventually do after several hours). However, if you defeat the raid and fail to capture the Pokémon, it will disappear, and you'll have to hunt down a new one. What Gigantamax Pokémon can I capture? A Max Raid battle (Image credit: iMore) The following Pokémon are available in Gigantamax forms in Pokémon Sword and Shield: Charizard, Pikachu, Eevee, Meowth, Butterfree, Machop (Sword only), Gengar (Shield only), Kingler, Lapras, Garbodor, Corviknight, Orbeetle, Dreadnaw, Coalossal, Flapple (Sword only), Appletun (Shield only), Sandaconda, Centiskorch, Hatterene, Grimmsnarl, Alcremie, Copperajah, Duraludon. There is also a handful coming to the game in the future that has not yet made an appearance: Snorlax, Toxtricity, Melmetal. Aside from trading with someone who has the opposite version, you can also join a friend's Max Raid battle with the opposite version of the game to battle and have a chance to capture a Pokémon that's exclusive to it. You won't be able to find them natively in the Wild Area, though. Any questions? Have patience. Gigantamax battles are incredibly challenging and can be difficult to find, given how similar they look to every other Max Raid battle. Keep hunting, and let us know in the comments if you have any questions about fighting these enormous monsters. Max Raid Sneasel (Image credit: Game Freak) Best Answer: Junichi Masuda, producer for Game Freak and the Pokémon series, told Game Informer: "Definitely. You can look forward to seeing Pokémon that didn't appear in these games appearing in different regions in future games." So while you won't be seeing them in Pokémon Sword and Shield for now, they'll likely make a comeback. Go for the offense: Pokémon Sword (opens in new tab) (\$60 at Amazon) Go for the defense: Pokémon Shield (opens in new tab) (\$60 at Amazon) (Image credit: Nintendo) Pokémon has been around for the past two decades and then some, so the number of Pokémon that have been introduced in eight generations has become quite unwieldy. According to Masuda, the company has been proud of being able to include so many Pokémon in previous games, but they've had to abandon new features and gameplay ideas as a result. Instead, Game Freak is going to think about the future of the franchise from this point forward, and prioritize new gameplay ideas and new ways to enjoy the game. This decision was agreed upon by Nintendo, The Pokémon Company, and Game Freak, and they want to continue coming up with these new features, so this will be the path for Pokémon going forward. (Image credit: Nintendo) As far as why some Pokémon won't be appearing in the Galar Regional Dex, things got a little complicated. The main reason was that the developers had to figure out which Pokémon made sense for the setting of the game. Which Pokémon look like they could live in the Galar region? Per Masuda, the team spent a lot of time and effort figuring that out, along with the features that they wanted to implement. Even though we aren't getting every single Pokémon from previous generations, there will still be quite a few older Pokémon that you'll see in Galar. Some even have new evolutions or forms, such as Sirfetch'd (Pokémon Sword exclusive) and Galarian Ponyta (Pokémon Shield exclusive). Pokémon Sword and Shield Sirfetch'd (Image credit: Nintendo) With this new approach, it's very possible that you'll see your favorites in future games. Masuda also confirmed the possibility. This new approach means each game has its own set of Pokémon that live there, which makes players try out new team combinations rather than relying on the same six Pokémon game after game. It opens the game up for experimentation and variety. Pokémon Home (Image credit: Nintendo) Do you miss your Pokémon though? There might be a way to get them all together despite not appearing in the upcoming game. Pokémon Home was announced this year, but there aren't many details about it. Masuda does say that the intended use case for Pokémon Home is a "place for all of your Pokémon together," and claims that it will be important for the future of the franchise. It will be more than just another Pokémon Bank. Creator: PCL.G Version: v1.0.2 (Completed) Hack of: FireRed Updated: April 8, 2022 As the name suggests, Pokémon Sword and Shield GBA tries to adapt the history and region of the original Pokémon Sword and Shield games for the Nintendo Switch with characters, events, and even systems. Also, be sure to try out Pokémon Supreme Fire (Final Remake) Logically it is not 100% the same as the switch version but, it is good as you're gonna get for GBA. (creator's commentary) this is my first rom so don't expect anything to go head-to-head with these ROMs that have been in production for years.-to Gigantamax/Dynamax your Pokémon (the ones that can Gigantamax/Dynamax) you need to get a wishing star and activate it in battle by pressing start. About the game Sword and Shield's events take place in the Galar region, a large, narrow expanse of land that is one of many in the Pokémon world. The game's director, Shigeru Ohmori, described it as a more modern setting. The region is heavily influenced by the United Kingdom, with many landmarks resembling the Houses of Parliament and the Cerne Abbas Giant. Country towns with cottages and Victorian architecture can be found to the south of the Galar region. An Industrial Revolution-style city with steampunk elements populates the region's centre. Also, be sure to try out Pokémon Supreme Fire (Final Remake) As implemented by Rose, the Galar Pokémon League Chairman, many of the region's towns and cities have Pokémon Gyms designed to look like football stadiums, displaying both Dynamaxing and Gigantamaxing. Snow-covered mountains dominate much of the region's northern areas. The Wild Area, a large open world area with many roaming Pokémon species, covers a large portion of the region's south-central region. The weather in the Wild Area changes frequently. As with Pokémon Sun and Moon, Pokémon previously introduced in previous games, such as Weezing, gain regional Galarian Forms with new typings, stats, and appearances. Some Pokémon, such as Linoone and Meowth, can even evolve in different regions.
