How to draw shoes from the front. How to draw shoes side view. How to draw shoes easy. How to draw shoes on a girl. How to draw shoes on a person. How to draw shoes step by step. How to draw shoes anime. How to draw shoes for kids.

Drawing cartoon shoes: some fun facts before starting sketching! Some modern shoes can be produced in over 100 different sizes! In the US, 400 million pairs of sneakers are sold each year. In America, sneakers appeared around 1915. Step 1 Drawing shoes as never been so easy! Shoes are made of leather, a tongue (2), a heel (4) and the outsole (5). Laces are also a very important part of the shoes. You can also try to draw sport shoes, running shoes or even high heels. They all have particular challenges. But overall, this tutorial should give you the tips you need to draw any of them rather easily. Step 2 For better readability, I have deliberately drawn only one of the shoes in order to visualize the shapes better. A shoe can usually fit into a rectangle. The laces are made of lines while the heel is made of a rectangle. The outsole is also made of a very thin and long rectangle. Why not try to draw a simple shoe? First, draw a rectangle with one of the edges being a little narrower. Next, work on the outline of your shoe to make it more realistic. Continue your work by drawing the heel and the outsole. Then, draw the holes near the tongue and add the laces. Finish your artwork by sketching some lines to represent the fabric and add colors. Step 4 Here you go! Now you have the choice of drawing a more realistic shoe (3), one with a more unusual outline (4) or even one with a pair of eyes (5)! Or why not draw clown shoes (1)! They can be a great challenge and make your lesson more enjoyable. Have fun drawing additional clothing below! :) 1 Sketch a curved line and a straight line as guide for the shape of the high heels. 2 Add the guidelines for the surface for the feet. Advertisement 3 Add basic design that you like. 4 Add more details. 5 Draw the main features of the high heel sandals. 6 Erase the draft marks. 7 Color. Advertisement 1 Sketch a big oblong. This will be the main guideline for the shoe. 2 Sketch a semi-circle at the top end of the oblong. 3 Add basic shape of the shoe. 4 Add the draft for the shoe's features. 5 Add the draft for the design of the shoe. 6 Draw the basic features of the shoe. 7 Erase the draft lines and add more details. 8 Color the shoe as you like. Advertisement 1 Draw a small circle (for the heels) and an oblong (for the toes). 2 Connect the sides of the circle and the oblong. Curving the line is optional. 3 Draw the sole following the bottom shape of the sandals. It's up to you how thick the sole is. 4 Draw the toe straps by drawing two arching lines (per strap) with the ends on the each side of your sandal. Also, draw an oblong connected to the sandal above the circle (from step 1), these will serve as the strap for the ankles to keep your sandal from wobbling. 5 Draw dark lines over your sketch (this is for your final outline). The design is up to you. 6 Erase the sketch and design and add more details to your sandal! Don't forget to color your drawing. Advertisement 1 Draw two lines. 2 Draw two ovals around the two lines. 3 Add two lines and four rectangles. 4 Draw some connecting lines, as shown. 5 Add all the needed details and do some shading. 6 Erase the guidelines. 7 Start coloring. 8 Finished. Advertisement Add New Question Question How do I draw cleats? Try drawing the tennis shoes, but at the end change the shape, making the entire shoe a little skinnier. Add more crossed laces on the top (optional), and add small bumps on the bottoms by adding little "U" shapes to create the cleats. Question How do I draw school shoes? You could probably alter the "Men's shoes" example in the article to make them look the way you want, or you could draw the "Tennis shoes" example and draw a strap instead of laces to make them look like Mary Janes. Question What brand are the tennis shoes? They can be any brand you'd

To create this article, 51 people, some anonymous, worked to edit and improve it over time. This article has been viewed 434,845 times. Co-authors: 51 Updated: May 28, 2021 Views: 434,845 Categories: Drawing Objects Article SummaryXTo draw a shoe, start by sketching a large, oblong shape, which will be a guideline for your drawing. Then, draw a semicircle at the top end of the shape for the opening of the shoe, and draw the basic outline of the shoe inside of the oblong shape. Next, start to add in the shoe's features, like the sole, the tongue, the laces, and the design on the outside. Once you've added the details, erase the oblong shape and finish your drawing by coloring or shading it in. To learn how to draw other kinds of shoes, like high heels and sandals, keep reading! Print Send fan mail to authors Thanks to all authors for creating a page that has been read 434,845 times. The shoe is one of those objects that you may assume would be a breeze to draw. After all, we see them every day as we put them on our feet, so how hard could it be? You might be surprised how tricky it can be when you sit down to actually do it, however, and this is something many artists have discovered the hard way. If you've ever wanted to learn how to draw a shoe, then this guide was made for you! We have created this step-by-step guide on how to draw a shoe in just 6 easy steps to make it easier than ever! How to Draw A Shoe – Let's get Started! Step 1 While it might be hard to sit down and draw a shoe from memory if you try to, there are a few elements that we can all agree on for the structure that are the standard for all shoes. We will be drawing a sneaker in this guide, and that means that it will have an almost completely flat base. You can use a ruler to draw a horizontal line. Near the end of the line, you should start to curve it up, at first gradually and then more sharply. You can then finish off the base with a very slightly curved line at the back, as you can see in the image. Step 2 – Draw in the outline of your shoe For this second step of your shoe drawing, we will be adding in an outline for your shoe. This part could be a little tricky at first, so I would recommend drawing with a pencil first and then going over it in pen later. We will take this step slowly as there are a lot of different elements to it. Starting from the back of the shoe, draw in a vertical, curved line. You can then draw in a horizontal line that dips sharply in the middle to form the opening of the shoe. From there, you can draw in a curved line coming up from the front of the shoe's base. Once you have that in, I would use a pencil to draw a line between the end of that line and the end of the opening of the shoe. Using that pencil line as a guide, you can draw in the sloping front of the shoe, making a few indents for the laces. For this step, you should really take your time and refer to the reference picture closely. I know you can do it! Step 3 – Now, we shall add in some laces Using the bumpy indents you made in the slope of the shoe previously, you can now draw in the laces. These may look complicated, but if you look closely at the picture, you will see that they're made up of some pretty simple shapes. You can draw in the laces themselves using some curved lines, and then use some circular shapes for the metal rims. Once those are in, you can finish off the lace section of your shoe drawing with some straighter lines around them. Step 4 – Add in some details for your shoe The previous few steps in this guide on how to draw a shoe were a bit tricky, but the last few steps are all about adding in some details! To start with, simply draw in a horizontal line along the length of the bottom of the shoe to make the base. Then, simply add in a curved line near the front like you can see in the reference picture. Step 5 – Now, you can add in the final details Your shoe drawing is very nearly done! The hard parts are over, so now you can have some fun adding in some fun details. Using some curved lines, you can add in the details that we show in our image, but don't be afraid to add in some details of your own! You could even draw in some accessories like buttons, stickers and other fun patterns to set your shoes apart! If you own sneakers like this in real life, you could also try to make this one look like your own shoe! Step 6 – Finish off your drawing with some color With those final details, you have completed your mission of learning how to draw a shoe! While you should be proud of this accomplishment, your shoe drawing just needs one more step to be complete, and it's a fun one! For this step, you should let your creativity flow and color in your shoe with all of your favorite colors. The picture we have shows just one way you could color it in, but the possibilities are endless! You could replicate your favorite shoe brand, make it look like your own shoe in real life or let your inner fashion designer out as you create your own design! This image would also be fun to use some beautiful different art mediums on. You could use paints and colored pens or pencils, but you could also incorporate some fun crafts such as beads or stickers onto it as well. I'm sure that whatever you choose, it's going to look amazing! 5 Tips To Make Your Shoe Drawing Even Better! You have an incredible shoe drawing, but now we will show you how to make it even better! As you well know, there are many more than just one make and style of shoe in the world, and the one we drew here is one of many. By changing a few details such as the shape of the shoe, the sole and the laces, you can create a whole new type of shoe! Do you have a favorite shoe brand you could turn this shoe drawing into? Some people like to make their shoes more personalized by adding small accessories to them. You could do the same thing for this shoe you have created! These could include little badges, stickers or other patterns that someone may use to give themselves some fancy footwear. Can you think of some accessories you could put on this shoe? Having one shoe is all well and good, but it would be useless unless it had a twin! For that reason, another way to make this shoe sketch even better is by drawing a matching shoe next to it. It would be easy to draw, as you would merely need to follow the steps of the guide to add another one next to this one. We always like to recommend adding a background to any of these drawings, as that really helps to take the drawing to a whole new level. For this one, you could draw the shoe next to some other objects. For example, maybe they could be with objects you would use on a run such as a water bottle. You could even draw the shoe to look as if it is being worn! Playing with colors is always so much fun, and you can try out all sorts of amazing colors for this drawing of a shoe. When coloring smaller details such as the laces and soles, you can use mediums such as colored pens, markers or small paintbrushes to give yourself a lot more precision. We would love to see the color combinations and mediums you use! Your Shoe Drawing Is Complete! You set out to learn how to draw a shoe, and now you've done it! This guide was made to make this process much easier for you, as breaking down a drawing into many steps can help make it much easier to grasp. We really hope that you had a lot of fun drawing alongside us with this step-by-step guide! Drawing it is just half the fun, though, as now you can have a great time personalizing your amazing shoe drawing! Will you draw in a background, add a leg in above the shoe or do you have some other creative ideas in mind? There are no wrong answers here, so we can't wait to see how creative you can be with your shoe drawings! This guide is one of many that we will be bringing out in the future, so be sure to check in to our site often to make sure you will be among the first to try out the new guides! We hope that you will share your colorful, creative shoe drawings to our Facebook and Pinterest pages! We're very curious to see how you finish off these drawings, and we can't wait to enjoy them.
