

Moto edge plus face unlock

Continue

HomeNewsReviewsGalleryVideosProduct FinderCryptoTop 5How To The Motorola Edge 20 Pro follows in the footsteps of previous Motos, and offers a stock Android look but with a fair share of in-house features added on top. Key among those is the 'Ready For' functionality, not unlike Samsung's DeX. But if we keep ourselves to the confines of the phone itself, the majority of the proprietary features are arranged in the Moto app. The first category is personalization allowing you to choose the icon shapes, the quick toggles appearance, the accent colors and the font. There is also a wide selection of wallpapers, the same ones you'd find in the Google Wallpapers app, plus some Moto-specific interactive ones. Moto App • Personalization Then come the gestures. Motorola's signature karate chop motion that turns the flashlight on and off and the twisting motion that launches the camera app are here, of course. Both work even when the device is locked. The lift-to-unlock gesture works well with the face unlock as it unlocks the device as soon as you pick it up and look at the screen. There is also Power touch. When you double-tap the power button, a shortcut menu appears where you can arrange apps, tools and even contacts for quick access. Gestures The display-related features are Peek Display and Attentive Display. The former works as a second-best alternative to the Always-on display but with some added functionality. The screen lights up when it detects motion that's close to the phone or when you pick it up. Once you've received some kind of notification, you can tap on it and see the message itself and even interact with it from the lock screen. As for the Attentive Display, it's pretty self-explanatory - it disables the screen timeout as long as there's a face looking at the phone. Pretty useful when reading long articles, though you do probably scroll often enough for the screen not to lock anyway. Display All of these aside, the rest is pretty much Android 11 as Google intended it to be, now in v.11. Notification grouping keeps your notification shade tidy and focuses on your conversations. Notification cards from ongoing conversations from your messaging apps will appear on top as high-priority compared to other app notifications. Notification Bubbles are available, too. Nearby Share with other devices running a recent Android version is also possible, making file transfers easier than ever. And lastly, we have the updated power menu that now displays shortcuts to connected devices such as home automation or Chromecast through the Google Home app. Lockscreen • Homescreen • Folder view • App drawer • Notifications • Quick toggles Motorola introduced the Ready For platform earlier this year with the Moto G100 - it enables you to use the phone as the heart of a big-screen setup for several use cases. Ready For is available on the Edge 20 Pro as well. By connecting a TV or a monitor, you can get a Windows-desktop-like experience, play a game on your phone, display it on the external screen, or even have a big-screen video chat experience. Ready For desktop The connection can be done with a cable - either with the Ready For cable (or another USB-C MHL Alt solution) or with a USB-C-to-C cable with a compatible monitor. Alternatively, you can connect wirelessly to a Miracast-capable display. If you don't have a mouse and/or keyboard handy, the phone's screen can be used as a trackpad and/or keyboard. Ready For Wireless • Wired with Windows PC • Trackpad You can also use Ready For on a Windows-based PC - it runs within a window on your desktop. This is helpful for when you want to run an Android app from your computer or to multi-task between devices on just one screen. Here, you can also enable Phone mode and view your phone's screen on the Ready For big desktop screen, which is on your Windows desktop. That's some inception-level multi-tasking! Ready For desktop on PC (i.e., same thing but in a window) Another use case of Ready For on a Windows PC is for video calls, where you can use the phone's camera to capture yourself and an external display to see the other participants. The final Ready For use case is for gaming on a bigger screen - be it TV or laptop/monitor. You connect an external controller and run the game on the phone, with the obvious benefit being the larger display for gameplay. Synthetic benchmarks The Motorola Edge 20 Pro is powered by the Snapdragon 870 chipset, a popular choice for high-flying midrangers this year - or flagship killers if you insist. The SD870 features an octa-core CPU in a 1+3+4 configuration with the prime core maxing out at 3.2GHz. The Adreno 650 handles the graphics. There are several RAM/storage configurations ranging from 6GB/128GB, all the way to 12GB/256GB, and we have the fully tricked-out version for review. The Edge 20 Pro showed conservative tuning in benchmarks, posting average numbers for its SD870. It's ahead of Motorola's own SD870-based G100 in both single-core and multi-core GeekBench, and inches ahead of the SD865 Galaxy S20 FE, but the Galaxy does counter with better multi-core performance. SD888 handsets like the Mi 11 and the OnePlus 9 do have an advantage in CPU-intense tasks. GeekBench 5 (multi-core) Higher is better Asus Zenfone 8 Flip 3673 OnePlus 9 3629 Realme GT 5G 3555 vivo X60 Pro 3490 Xiaomi Mi 11 3489 Samsung Galaxy S21+ 5G 3476 Samsung Galaxy S20 FE 3296 ZTE Axon 30 5G 3160 Motorola Edge 20 Pro 3140 Realme GT Explorer Master 3050 Realme GT Master 2917 Xiaomi Mi 11 Lite 5G 2909 Motorola Moto G100 2860 Xiaomi 11 Lite 5G NE 2832 OnePlus Nord 2 2792 Motorola Edge 20 2550 Poco X3 GT 2310 GeekBench 5 (single-core) Higher is better Realme GT 5G 1139 OnePlus 9 1129 Asus Zenfone 8 Flip 1126 Samsung Galaxy S21+ 5G 1091 Xiaomi Mi 11 1085 vivo X60 Pro 1034 Realme GT Explorer Master 1020 ZTE Axon 30 5G 985 Motorola Edge 20 Pro 972 Motorola Moto G100 950 Samsung Galaxy S20 FE 906 OnePlus Nord 2 814 Xiaomi Mi 11 Lite 5G 803 Xiaomi 11 Lite 5G NE 787 Realme GT Master 785 Motorola Edge 20 762 Poco X3 GT 693 In Antutu, the Moto ranked in the middle of the SD870 pack. A more clear divide can be seen here between the SD870 group and the latest high-end Snapdragons at the top. Conversely, phones based on the lesser 700-series SoCs are trailing behind. AnTuTu 9 Higher is better Realme GT 5G 810433 Asus Zenfone 8 Flip 797484 vivo X60 Pro 720352 Realme GT Explorer Master 717879 Motorola Edge 20 Pro 711090 ZTE Axon 30 5G 701991 Motorola Moto G100 681559 OnePlus Nord 2 598022 Poco X3 GT 578505 Realme GT Master 529263 Xiaomi Mi 11 Lite 5G 522490 Xiaomi 11 Lite 5G NE 497901 Motorola Edge 20 488574 In graphics benchmarks, it's a bit more of the same. The Edge 20 Pro posts average results for its hardware - SD888-based phones have the upper hand, SD778 and SD780 units can't quite keep up. It also dropped to a pretty low 69% of the initial results. On a positive note, however, it maintained a rock-solid 99% result in 3DMark's Wild Life stress test. CPU throttling test • 3DMark Wild Life stress test Motorola recently unveiled the Moto Edge 30 Pro in global markets and it seems like the company is preparing to launch the regular (non-pro) version of the phone, the Moto Edge 30. The device will be a successor of Motorola Edge 20 which was launched about 9 months ago.A report from 91Mobiles has earlier revealed renders and key specs of the phone. Motorola has not made any official announcements about the launch, however given the recent leaks we expect the phone to launch soon. Meanwhile today we have managed to obtain European prices, full specs, alongside all high resolution renders of Motorola Edge 30. Let's take a look at them!Motorola Edge 30 specifications:Motorola Edge 30 high resolution render in GrayMotorola Edge 30 front and back render in high resolutionOn front the phone will come with a 6.5-inch size pOLED display made by LG. The display will offer FHD+ (Full High Definition) resolution with 1080 x 2400 pixel count. Further it will support a maximum screen refresh rate of 144 Hertz.The phone will be powered by Qualcomm's Snapdragon 778G Plus 5G Mobile Platform. This processor debuted last year with HONOR 60 Pro. The Snapdragon 778G Plus is very similar to Snapdragon 778G, except that the Plus version offers higher base clock speed of 2.5 GHz compared to 2.4 GHz present in regular version.Motorola Edge 30 will share similar camera specs from its Pro version. On the back, the phone will feature a triple camera setup, consisting of 50MP Primary lens with OIS (Optical Image Stabilization), 50MP Wide-Angle lens and a 2MP lens for Portrait photography. The center aligned punch-hole display will carry a single 32MP selfie shooter.The device will pack a 4020 mAh Lithium-ion battery with 33W Turbo Power charging support. The charging brick will be provided in the box. For security the phone will utilize an under-display fingerprint scanner alongside face unlock. In the software department, the phone will ship with latest Android 12 OS and a bloatware-free stock Android UI. Motorola Edge 30 will measure 159 x 74 x 6,7 millimeter in dimensions and 155 grams in weight. Other connectivity features include Bluetooth 5.2, Dual SIM, NFC, Wi-Fi 802.11 a/b/g/n/ac/ax, 2.4 GHz/5 GHz/6 GHz, Wi-Fi 6E, GPS, AGPS, LTEPP, SUPL, Glonass, Galileo. Sensors list includes Proximity, Ambient light, Accelerometer, Gyroscope, Magnetometer sensor.Motorola Edge 30 Prices, Color and Storage options:Motorola Edge 30 in all color options (credit: 91Mobiles)The phone will be offered in Grey, Silver and Green color options. The base 6GB + 128GB option will cost EUR 549, while the 8GB + 256GB option will cost EUR 649. Storage and color configurations may vary depending upon the country. The device is expected to go on sale from May 5 in Europe.
