Sorlomon's PRANCE mode adjusts the combat range settings in the game to move them more in this direction³ which means that the Skyrim third-person combat should feel a little more, er, last. The mod reviews a lot³ aspects in pursuit of this goal, including making contact with the weapon more visual and really accurate. What this does is it takes control off your face, and then it returns it to you. The Elder Scrolls has a dubious record when it comes to third-person chambers. Third-person specific combat games, such as The Witcher and Dark Souls, say, do not have the same need, so they can make use of collision boxes³ smaller and A³ realistic. Always land your hits. Enter, as always, the modders. However, if they suddenly change trajectories, fail. Open the console and use A³ player: rAcA³ twice. The mod also adjusts a range of Dragonborn's movement speeds, which means that traveling on snowy roads and walking paths will reflect the speeds of "real-life athletes" a little closer. Fixing the third person bug: Skyrim If you ever wanted to strike murderous blows or break into brutal villains with your shield in Skyrim was more of a close and personal experience, a Skyrim modder might have the answer: "PRANCE!" That is, the mod of SorlomonA³ s "acci Proportionally realistic "only" combat extension", which adjusts the speed of movement and combat range of the RPG game to make them "more consistent and have some connection with realism", though not at the expense of making things "difficult." action looks much more modern, similar to the aforementioned RPGs. Many mod collections have tried to do the same, but still with that clumsy third person Skyrim jank from 2011 à it seems different in that sense. At the top of the list is his third-person camera, which was rough in 2011 and feels very old-fashioned here in 2021. Using it in Morrowind is not advisable and Oblivion will give you a burning headache. Otherwise, Homing shells do what it says on the can. SkyrimA³ s was a little better, but she still wasn't up to her third-person cohorts, it won't look like you hit your head too many times in combat now.
