## Two and a half months

To move to a new apartment, you have to make arrangements with the owner. There are some details to knock, as much as you pay, how many people (if present) will live in place with you and how long do you expect to stay. These provisions are usually formalized in a rental or renting contract, which is a binding legal document. The duration of your stay is one of the main factors in determining the type of agreement in which you enter. One of the most popular agreements is a fixed-term lease contract, and the length of the most popular term is a year. These fixed-term agreements have advantages both for the owner and for the tenant. Treatment rates are blocked and promote costs and cost control for Landlords.a month-month rental agreement has a relatively short term. Although it is less common than an annual fixed time lease contract, it can have its advantages. If you don't know how long you stay in an area or you will be able to stay there for less than six months to a year, then opting for a short-term and flexible rental is a practical choice. If you sign a longer agreement and you can't stay throughout the term, you may be legally responsible for paying the full amount of the rental contract whether you are there or not, or you will need to find someone to sublet the apartment. Because they are so flexible, month-month-month leases are popular with students, people traveling for work and vacationers. There are some disadvantages for a month-month rentals you should consider: the rental amount can increase in short notice. Performed renters can be taken notes to free or undergo changes to the rental terms, as a modification of pets policy, on relatively short notice. Since a landlord can support higher expenses, such as cleaning, advertising and credit checks on short-term rental apartments, these costs are usually transmitted to the equity in the form of slightly higher rentals. Leases at a term expiration can only be available in some limited locations, as close to university, in tourist cities or in low-income areas. Photo of courtesy: Natasha Mustache / Getty Images say what you will be about 2020, but it is certainly a year that none of us will never forget À é â – "to put things the most delicately possible. From the lack of mass toilet paper À a massively controversial presidential election, the beginning of this decade has inaugurated more than its right share of historical events. Considering the fact that many of us have been repaired in position for months at the end - distracted from a global health crisis and constantly Bombardata with progressively demanding news "À é â –" It is easy to understand why many of us looked back on 2020 as a great blur. It was exactly this: a difficult, often heartbreaking blur and sometimes optimistic. But with all the great things that have happened, it is important to maintain a perspective - if not only on the biggest events. These are the stories that have defined every month that looks like the most year We have always been there. On January 26, the legendary Kobe Bryant basketball player, his 13-year-old daughter Gianna and another seven years were killed in a tragic helicopter accident on their way to a basketball match at Bryant Mamba Sports Academy. The foggy conditions and the light rain covered the area around Calabasas, California - the site of the accident - that day, and although the final cause of the crash remains unknown, time may have caused the pilot to lose control of the Aircraft. Photo courtesy: Allen Berenzovsky / Getty Images millions of people around the fraget world And his daughter, including Los Angeles Lakers members, which was the only professional team Bryant played during his entire career for decades. The tributes began to check the most far from Japan and the Philippines, and the Lakers later dedicated their 2020 October championship the NBA championship with the memory of Bryant. "He had zero defects," he noted the colleague legend of basketball LeBron James, and leaves behind the heireness to be one of the gods Talented stars and nba puzzle. This left and slow story of a down-on-the-lucky family slowly infiltrating the life of a rich family while turning to important subjects such as social inequality and the disparities of harvested harvesting wealth for everything, from his themes to his execution. These elements, coupled with the slow transition of the film from the all-out reduction of the irrelevant unreported roll, fixed in an adaptive way, the parasite place bong joon-ho<sup>À</sup>, à € the place of the parasite in the pantheon of cinema not to be missed. The film made history not only on the screen but also at 92 À ° Academy Awards. Photo of courtesy: CJ Entertainment / IMDB In the end to win the Oscar for the best photo (between a handful of other awards), the parasite was the first non-English-linguistic film to take home the first prize of the show - one Decision that conducted the industry leader to feel the film "The best winner of the most important image and that change game in the history of the Oscar." Why so much fanfare? According to Los Angeles Times Critic Critic Justin Chang, the parasite "scared the Academy in recognizing that no country's cinema has a monopoly on greatness". After so long, the "organization's efforts to diversify its ranks and become truly global institution" were finally making an impact along and giving cinematic masterpieces - wherever they may come from À é â – "the recognition that deserve. It is not a stretch to say that 2020 will be forever associated with the novel Coronavirus and Covid-19, the disease that the pathogen cause. First emerge in Wuhan, in China, in January 2020, it was not until the ' March 11 "enough time for hundreds of thousands of people around the world to contract the mysterious disease - that the World Health Organization officially considered the Coronavirus a pandemic. Photo courtesy: Allen J. Schaben / Getty Images On March 13, Donald Trump said a national emergency virus, the states of suggestions remain the aforementioned quarantine procedures and the centers for the control of the disease and prevention (CDC) To start detailed various sizes to slow down the spread of Covid-19. In December 2020, the virus had info over 76 million people around the world, resulting in a world death toll of over 1.5 million. At the beginning of April, the Prince of Great Britain Harry and the wife of Meghan - the Duke and the Duchess of Sussex - have officially done well their January announcement that would have been shining from their positions no more than working family members Real British or representing the queen. The first of the month marked their first day without using their real titles. The couple shocked millions of people all over the world when they announced that they would take a step back from advertising that comes with real roles, instead opting to live a quieter life, more private while lifting children and building their own brand. Photo of courtesy: Karwai Tang / Getty Images from April, they stopped receiving public funds for their work and do not use the title "real height" - but they kept the Duke and Dukess of Sussex designations. The couple spent the months from their official departure browsing the Covid-19 pandemic, raising their son Archie and building a new life in Santa Barbara, California. On May 25th George Floyd, a 46-year-old blackd man, was arrested and murdered by Minneapolis police officers after a convenience store clerk told 911 Floyd had used an invoice of \$ 20 counterfeits to make a purchase. The horrible death of him, who has occurred while police agents knelt on his neck and his body, was captured in video He turned on the legitimate outrage among the Americans who reacted with the horror. Millions have channeled this energy by taking the streets in mass numbers to protest Floyd's death, ask justice and recall the end of the police's brutality that disproportionately aim at the people of color. Photo of courtesy: John Lamprarski / Nurphoto Via Getty Images The protests, many of which were organized by the group of Civil Rights Black Vine Matter (BLM), continued continued Most of 2020 in the city throughout the country. Although these widely peaceful gears were sometimes encountered with the government's retaliation, the resulting movement has become the largest in the history of U.S. Although the struggle for continuous racial equality, the BLM and the protests this year unleashed some necessary changes in the police reform, in education, in the medical community and even in the entertainment industry - when those changes were needed More than ever. 2019 was a bit of a vortex - not a full tornado like 2020 à – "when it arrived at the news stories, but the policy was still on the front line. You could remember that there were nearly 30 presidential candidates Of the Democratic Party that throwing their hats in the ring and participate in primary debates started in June 2019. With the passing of months and television has continued, many of us have been left asking if a candidate actually emerge in reality. Photos Courtesy: Olivier Douliery / AFP Via Getty Images A Frontrunner did at the end surface, after 11 debates and months of speculation, Joseph R. Biden, Longtime Delaware Senator and 47 À ° Vice President of the United States, announced on Twitter On June 5, which is guaranteed more than 1,991 delegates necessary to officially receive the party's nomination. This was perhaps not a huge surprise, considering that all other former democratic presidential candidates were R litrs from the race by April. Nevertheless, it became technically official, and the party has finally had a clear image of its roadmap to the elections. The California Wildfire season typically lasts every year from July to November, finishing when the first great fallen rainfall and dampen the flames are held. 2020, however, saw an extended season that had become "the worst in the history of the State as far as the amount of land burned" according to CNN - and which was precisely in September. While some smaller fires unleashed in May and June, in July he saw an important increase in occurrences and a breath of flames that in the end have rolled up hundreds of thousands of acres. The complex fire of red salmon, which started July 26, alone almost 150,000 acres. Photo courtesy: Kent Nishimura / Los Angeles Angeles Times / Getty Images These wildfires put the stage for the rest of the tragic season: five of the six largest California fires took place in August and September of 2020, creating infernal landscapes, Triggering emergency evacuations and the coverage of much of the state in a dense and harmful smoke. Several years is more than 9,600 burned fires well in December, and the reason is clear. "Climate change plays an undeniable role in unprecedented wildfires in recent years," explains Scientific American. "More than the acres of the burned acres every year in the western United States can be attributed to climate change." For months, the world wondered that the potential presidential candidate Joe Biden selected as a functioning companion. Once he was clearly becoming the presumed candidate, "he promised to choose a woman like his potential vice president", and many have begun to speculate as a name from a variety of senators and state leaders, ultimately taking. Photo courtesy: Stefan Reynolds / Bloomberg Via Getty Images on 11 August - Only days before their appointment to the Democratic National Convention 2020 - Biden officially announced its democratic primary rival and the Senator Junior of California, Kamala Harris, would become the Deputy presidential candidate. While this announcement was so awaited, it was also one for history books. Harris has become the first woman and the first person in color to receive the nomination of Of a large political party by U.S., bringing a diversity so much needed to the White House. In the wake of Kamala Harris who make the titles with her historical nominative, the United States lost one of the greatest champions of gender equality that we have ever had the privilege of knowing. On September 18, 2020, Associated Justice Ruth Bader Ginsburg has passed due to of of cancer at 87 years. Ginsburg spent 27 years serving on the Supreme Court - and dedicated a whole life at the end of the conclusion of discrimination and breaking barriers. Photos courtesy: Eugene Gologursky / Getty Images from his first days working as a legal researcher and a law professor to his subsequent years as a judge and any associate justice, Ginsburg supported our equality in any case À é â – "and not He never stopped pushing for our right to live authentically, not even. It is because many of us are authorized to possess our destinies, and its contributions to the justice system have rightly secured a place in history as an icon Prominent feminist. The evening of 1 October, Donald Trump announced that he and his wife Melania had tested positive for the Covid-19 - which means that he was potentially infected when he participated in the first presidential debate with Biden on September 29th . Trump was subsequently admitted to Walter Reed National Military Center Medical Center, where he made a series of video presences and later wizard Ostenitors outside the structure, while it was still being treated. Photo courtesy: Ken Cedeno / Polaris / Bloomberg Via Getty Images The second debate of thre was scheduled on October 15th. Trump had returned to the White House on October 5th and started hosting public events in the days following his download from Walter Reed. The organizers provided for the second debate to which virtually, with candidates who participate through liveStream from remote places, but Trump refused to respect these restrictions, to choose instead to participate in his municipalità on NBC. The third programmed debate took place as expected on October 22nd, 2020 the first electoral year since 1996 in which only two presidential debates took place. After one of the most divisive presidential elections in the history of the United States, November has finally revealed a victory for the President elected Joe Biden and Vice President elected Kamala Harris. At the beginning of the month, after days of state-owned state-owned days after an election with one of the largest entrances and unprecedented levels of absent voting, Biden and Harris appeared in a television acceptance event in Wilmington, Delaware. Photo of courtesy: Win McNamee / Getty Images In the speech of him, Biden invited the units among the Americans as he delivered a message of hope for the next four years. "I worked hard for those who didn't vote for me like those who did it", Biden reassured voters. "Let this sad was of demonization in America to begin to finish here and now ... there has never been anything that we were unable to do when we did together." After a year of significant historical and minimum prime, a light has finally appeared at the end of the tunnel in the last 2020 moments: after months of wide development, test and rapid tracking, the pfid-19 pfid pfid vaccine vaccine candidate PFIFIZ. Received the authorization of emergency use from the United States food and drug administration. Although the vaccine has yet to be subjected to various other rounds of long-term tests, the first doses were administered to health workers on December 14th. Photo of courtesy: Joe Raedle / Getty Images as the toll of Covid-19 on the United States has exceeded 300,000 deaths, the vaccine has arrived at a time when many of us needed more à – "not only To avoid contracting the disease, but also to boy ourselves and increase our morality at the end of what was a dark and difficult year. Because the vaccine continues to become more widely available, hopes are high that a return A new normal form is For 2021. 2021. 2021. = 76.0921247 days. two and a half months pregnant. two and a half months from today. two and a half months pregnant baby. two and a half months hyphen. two and a half months ago. two and a half month old baby. two and a half months after breakup. two and a half months ago from today
