Flexibility of choice with the Microsoft data warehouse portfolio The latest APS update is an addition to the already existing data warehouse portfolio from Microsoft, which covers a range of technology options and implementation that help customers get faster information . Customers explore warehouse data products. Also consider the SQL server with fast track for Data Warehouse DataHohahoHohoHouse SQL Warehouse, a fully managed cloud service based on the cloud. Microsoft provides a best-in-class environment (Multiple CPU, high memory) to manage a huge volume of data and calculation. Better late than ever: the system of Analytics (APS) platforms, which is a renaming of the warehouse of parallel data (PDW), has released an update of the appliance (AU6) about a year ago, and I lost the announcement. Å, below is what is new in this version, also called APS 2016.å, APS is alive and well and there will be another year of the next calendar AU: Microsoft is pleased to announce that the update of 'Appliance, the 2016 analysis platform system (APS), was released to production and is now generally available. The APS is the scale of Microsoft and the massively integrated processing processing system for specific workloads of data warehouses. Error [Error]: The remote server has returned an error: (400) bad request. Å ¢ â,¬ â ¢ batch loads Å ¢ â,¬ "Partitioning logically data loads, for example by country, client or geography. Can manage the processing and storage requirements of current and future data. Å ¢ â,¬ â ¢ Join Join a Å ¢ â,¬ "Use Union joins instead of research whenever possible. SQL Server 2016 APS 2016 runs on the latest version of SQL Server 2016 and now uses default database compatibility, level 130, which can support query performance SQL Server 2016 allows APS to offer functionalities such as secondary index support for KCI tables and Polybase Kerberos support. Other T-SQL features include hash and order group group tips to provide greater control over the improvement of query execution plans.Better.better AU7 also includes firmware and latest drivers with hardware and software patch to address spectrum / meltdown vulnerabilities from our hardware partners. Managementscustomi improvements already on APS2016 will experience an advanced update process for APS AU7 which allows a shortest maintenance window with the possibility of uninstalling and rollback in a previous version. AU7 also introduces a section called Switch Feature in Configuration Manager that provides customers with the possibility of customizing the behavior of new features. More information: Microsoft releases the latest analysis platform system update Å ¢ â,¬ â ¢ Loading is changed only Rows: Detection Delta Å ¢ â,¬ "Using the timestamp for new records and modified to the ETL source . Transact-SQL APS 2016 supports a larger set of T-SQL compatibility, including support for larger stripes and a large number of lines, Å ¢ Varchar (max), Å ¢ Nvarchar (max) Å ¢ and å, Varbinary (max). For greater analysis flexibility, APS supports the complete window window syntax for rows or range and additional window functions such as before\_Value, Å, ultimate\_Value, Å ¢ cume\_distÅ ¢ and percent\_rank. Å »Additional functions Like the new () Å ¢ and the Rand () works with the new data type support for the exclusive. å, for the complete set of supported T-SQL, visit the online documentation. Å ¢ â,¬ â ¢ Limiting the transformations of asynchronous data / blocking data transformations Å ¢ â,¬ "sorting and between Aggregate formations. APS AU7 also adds support for setting more variables from a single selection instruction by reducing the number of redundant round trips to the server and improve the overall query and the ETL performance time. The tuning Options above the performance carry out performance improvements to small data loads or Source: Microsoft Key Features Å ¢ â,¬ "A13 Bionic chip2x multiple storage Å ¢ â,¬ "Start 64 GB12MP Ultra Camera Large with Stage8MP Center Back Camera20% Camera20% CPU and GPU performance 10.2 - Retina DisplayTouch IDAPPLE Pencil Support for pencil DisplaySmart Keyboard Support for battery day iPad Mini Main features - A15 Bionic Chip8.3 - Liquid Retina Liquid Display12MP with True Tone Flashtouch ID5G SupportUSB-C Port40% fastest CPU and 80% GPUWIFI 6APPLE Pencil SupportlandScape Stereo Support for the All-Day Life iPhone 13 and iPhone 13 Mini Main features Å ¢ â,¬ "A15 Bionic Chip12MP True Tone Camera 4K60 HDR with Dolby Visionip68 Water Resistant5g Support 15 (Available on September 20 2021) Night mode on all sizes of the camerascreen Size iPhone 13 Å ¢ â,¬ "6.1 Å³ & iPhone 13 Mini Å ¢ â,¬ "5.4 Å³Browter Super Retina Displays the film mode Å ¢ â,¬ "Capture video with the sensor SHIFTNEW AUTO FOCS BOCUS camera with OISULTRA wide camera system to capture Safe support MOREMAG The longest fi battery life no to 2.5 hours of departure from \$ 699 iphone 13 pro & iphone 13 pro max key features max Å ¢ â,¬ "a15 bionic chip with 5-core gpu12mp all new, telephoto lens and ultra wide camerapromorion dyspla y Å ¢ â,¬ "10Hz 120Hz Dynamic Update Rate4k60 HDR with Dolby Visionip68 Water resistant RESISTANT5G Support 15 (Available on 20 September 2021) Storage Å ¢ â,¬ " 128 GB | 256 GB | 512 GB and 1TB for iPhone 13 Pro in maximum mode with the screen size Lidar iPhone 13 Pro Å ¢ â,¬ "6.1 Å³ & iPhone 13 Pro Max Å ¢ â,¬ "6.7 - 6.7 Å³Bright Super Retina Displays the cinematographic mode Å ¢ â,¬ "Video capture with car Focus Boforesprores VideoMacro photographyMag Safe support for battery plus the battery life up to 2.5 hours of opening from \$ 999 Apple Watch 7 Main features Å ¢ â,¬ "Great always on Retina ECG and oxygen display Oxygen measurement Oxygen measurement Asterisable measurement Chabbiamento Everfoglia watch Å ¢ â,¬ "80% in 45 minutes of charging. Windowazure.storage.blob: Speak Azreconsolepp {public class GetBlobcontent {Static public public {Const String StorageAcountName = "Enter the name of the storage account"; Const String StorageAccountKey = "Enter the Storage Account key"; Var StorageAccount = New CloudstorageAccount (new microsoft.windowsazure.storage.auth.storageaccountname, storageaccountkey), True); Client CloudBlOpt = StorageAccount.CreatecloudBloBlClient (); CLOUDBLOBCONTAINER container = client.getContainERreference ("containerername"); Cloudblockblob blob = container.getblockblobreference ("filename"); Content Var = Blob.downloadTextSync (). Result; var blobname = blob.Name; Console.writeline (blobname); Console.writeline (contents); Console.lead (); }} Statement of the problem: He was using the SSIS package with the script component to read the data from Azure Blob Storage -> Container and suddenly stopped working with the following error. This update of the appliance is based on the version of SQL Server 2016 as a foundation to offer many value-added functionality.å, APS 2016 offers additional linguistic coverage to support SQL Server migrations and other platforms. It also has security improvement for hybrid scenarios and the latest security systems and bug fixes via new firmware and drivers updates. The pre-ordered data is preferred for high volume ETL. Canceled lines cannot be managed. Check your version Å ¢ â,¬ Å "Minimum TLS Version" If the TLS version is 1.1 or 1.2 Use the code below in your script component to prefer the highest version on higher Versions of TLS. This is one Future test solution Like its scalable, fault tolerant and customizable. Then it is joined to these keys rather than using the transformation of the search (saves use of RAM). Version 1.0 is already deactivated by Microsoft. Upcoming For more details on these features, visit our online documentation or download client tools. Below are pointers I understand and I think are the best practices for the development of the SSIS performance. Å ¢ â,¬ â ¢ Staging targeted Å ¢ â,¬ "Staging table to load the company keys from the source system. Update update Applezzi APS Update 6 is a prerequisite to upgrade to update the update 7.Faster PerformanceApps AU7 update now provides the possibility to automatically create statistics and update of existing obsolete statistics for improved query optimization. Use of the requirements for your existing data loads. But for business data loads and parallel processing of rapidly growing data volumes you can try something out of the box: PDW: Parallel data warehouse Å ¢ â,¬ "Analysis platform System Å ¢ â,¬ " PDW uses The calculation distributed with more parallel processors, machines and services that work synchronization with Microsoft On-Premised Client Tools (ETL Å ¢ â,¬ "is, SQL Server, SSAS, SSRS ...). APS AU7 Builds On Appliance Update 6 (APS 2016) releases as a foundation. Installation and update improvement updates The hardware architecture updates have the latest generation processor support (BroadWell), DD4 DIMMS and the improvement of DIMM Throughput DIMM - these will be sent With Hardware purchased by HPE, Dell or Quanta. This update offers customers an improved experience update and distribution due to the pre-package of certain Windows Server updates, updates Rapid namenti and an installer that previously required a download on site. Å ¢ â,¬ â ¢ Extract the data in parallel Å ¢ â,¬ "using sequence containers or perform independent packages in parallel. Å ¢ â,¬ â ¢ defaultBuffMaxsize & defaultBuffRmaxRows increase the increase in the buffer (control flow) Å ¢ â,¬ Å ¢ MaxEnginethreads (default is 10) and MaxConcurrentexecutables Å ¢ â,¬ "Set Value to max (-1 default Å ¢ â,¬ " 2 processor and 4 parallel activities, 1, 2 Å ¢ â,¬ |) Å ¢ â,¬ â ¢ #temp table vs ctes Å ¢ â,¬ "Sometimes it is better to use CTE on the temperature table with Å ¢ â,¬ â ¢ as a force sequential processing for the task within SSIS. Å ¢ â,¬ â ¢ Use ELT (load extract and then turn) if ETL has performance problems. Cause Root: AZRE Account account TLS The configuration has been updated by infrastructure as from Microsoft guidelines on security problems with TLS 1.0 FIX: go to your Azure Storage space And go to Settings -> Configurations. Servicepointmanager.securityProtocol | = Securityprotocoltyle.tls11; Work in Microsoft as a solution architect and a former SQL Server MVP server focusing on Big Data and Data Warehouse Architecture Jamederra.Categoridata Science & StatisticsSenterRise Software & Sapionte Vedra, FL | Languages The Analytics (APS) platform system, which is a renaming of the Parallel Data Warehouse (PDW), has just released an update of the appliance (AU7), which is a sort of a service pack, except including many new features . Below is what's new in this version: customers will get significantly improved queries and advanced security features with this version. Polybase / Hadoop Enhancements Polybase now supports the latest HORTONWORKS HDP 2.4 and HDP 2.5.- This appliance update provides greater safety through the Kerberos support via database environmental credentials and credential support with Azure Storage BLOBS for greater safety through large data analysis. Post keys are then used by the search or blend for data loads. APS 2016 also supports full domain name support, making it possible to configure a domain trust for the appliance. It also ships with the latest firmware / drivers updates containing security and correction updates. The temp table behaves well in some scenarios.
