1. A plant is ...
 - A. an autotroph
 - B. a heterotroph
 - C. a primary producer
 - D. A and C
2. A cow is ...
 - A. a primary consumer
 - B. a heterotroph
 - C. an herbivore
 - D. all of the above
3. Autotrophs ...
 - A. make their own food
 - B. are the base of the food chain
 - C. are primary producers
 - D. all of the above
4. A lion that eats a zebra that ate grass is a ...
 - A. primary producer
 - B. primary consumer
 - C. secondary consumer
 - D. quaternary consumer
5. A bear that eats a fish that ate bugs that ate algae is a ...
 - A. primary producer
 - B. primary consumer
 - C. secondary consumer
 - D. tertiary consumer
6. A person who eats a chicken that ate grain is a ...
 - A. primary producer
 - B. primary consumer
 - C. secondary consumer
 - D. quaternary consumer
7. Primary consumers eat ...
 - A. primary producers
 - B. primary consumers
 - C. secondary consumers
 - D. quaternary consumers
8. Secondary consumers eat ...
 - A. primary producers
 - B. primary consumers
 - C. tertiary consumers
 - D. quaternary consumers
9. Tertiary consumers eat ...
 - A. primary producers
 - B. primary consumers
 - C. secondary consumers
 - D. quaternary consumers
10. Quaternary consumers eat ...
 - A. primary producers
 - B. primary consumers
 - C. secondary consumers
 - D. tertiary consumers

Name: _____
 Biology (Spring)
 LP 8, Day 1

Levels of Organization

Directions: Read Ch. 28.1 "Levels of Organization" on p.852-856. Use the diagram provided to show the relationship between the 5 levels of organization.

Genotype	Phenotype
AA	Red
Aa	Red
aa	White

Doodle Notes

Non-Mendelian Inheritance

Multiple Alleles
 Some genes have more than two possible alleles. However, the offspring still only inherit two. A good example is human blood type.

Incomplete Dominance
 The dominant allele does not completely mask the other allele. This results in a phenotype that is a blend of the two alleles.

Codominance
 The offspring inherit both alleles of two different dominant alleles. This results in a phenotype that shows both alleles.

Polygenic
 When more than one gene contributes to a phenotype, it is called polygenic inheritance.

Sex-Linked Traits
 Genes located on the sex chromosomes (X and Y) are called sex-linked traits.

Punnett Squares - Non-Mendelian Inheritance

R	r
R	rr
r	Rr

What is the probability of a red offspring?
 A. 100%
 B. 75%
 C. 50%
 D. 25%

What is the probability of a white offspring?
 A. 100%
 B. 75%
 C. 50%
 D. 25%

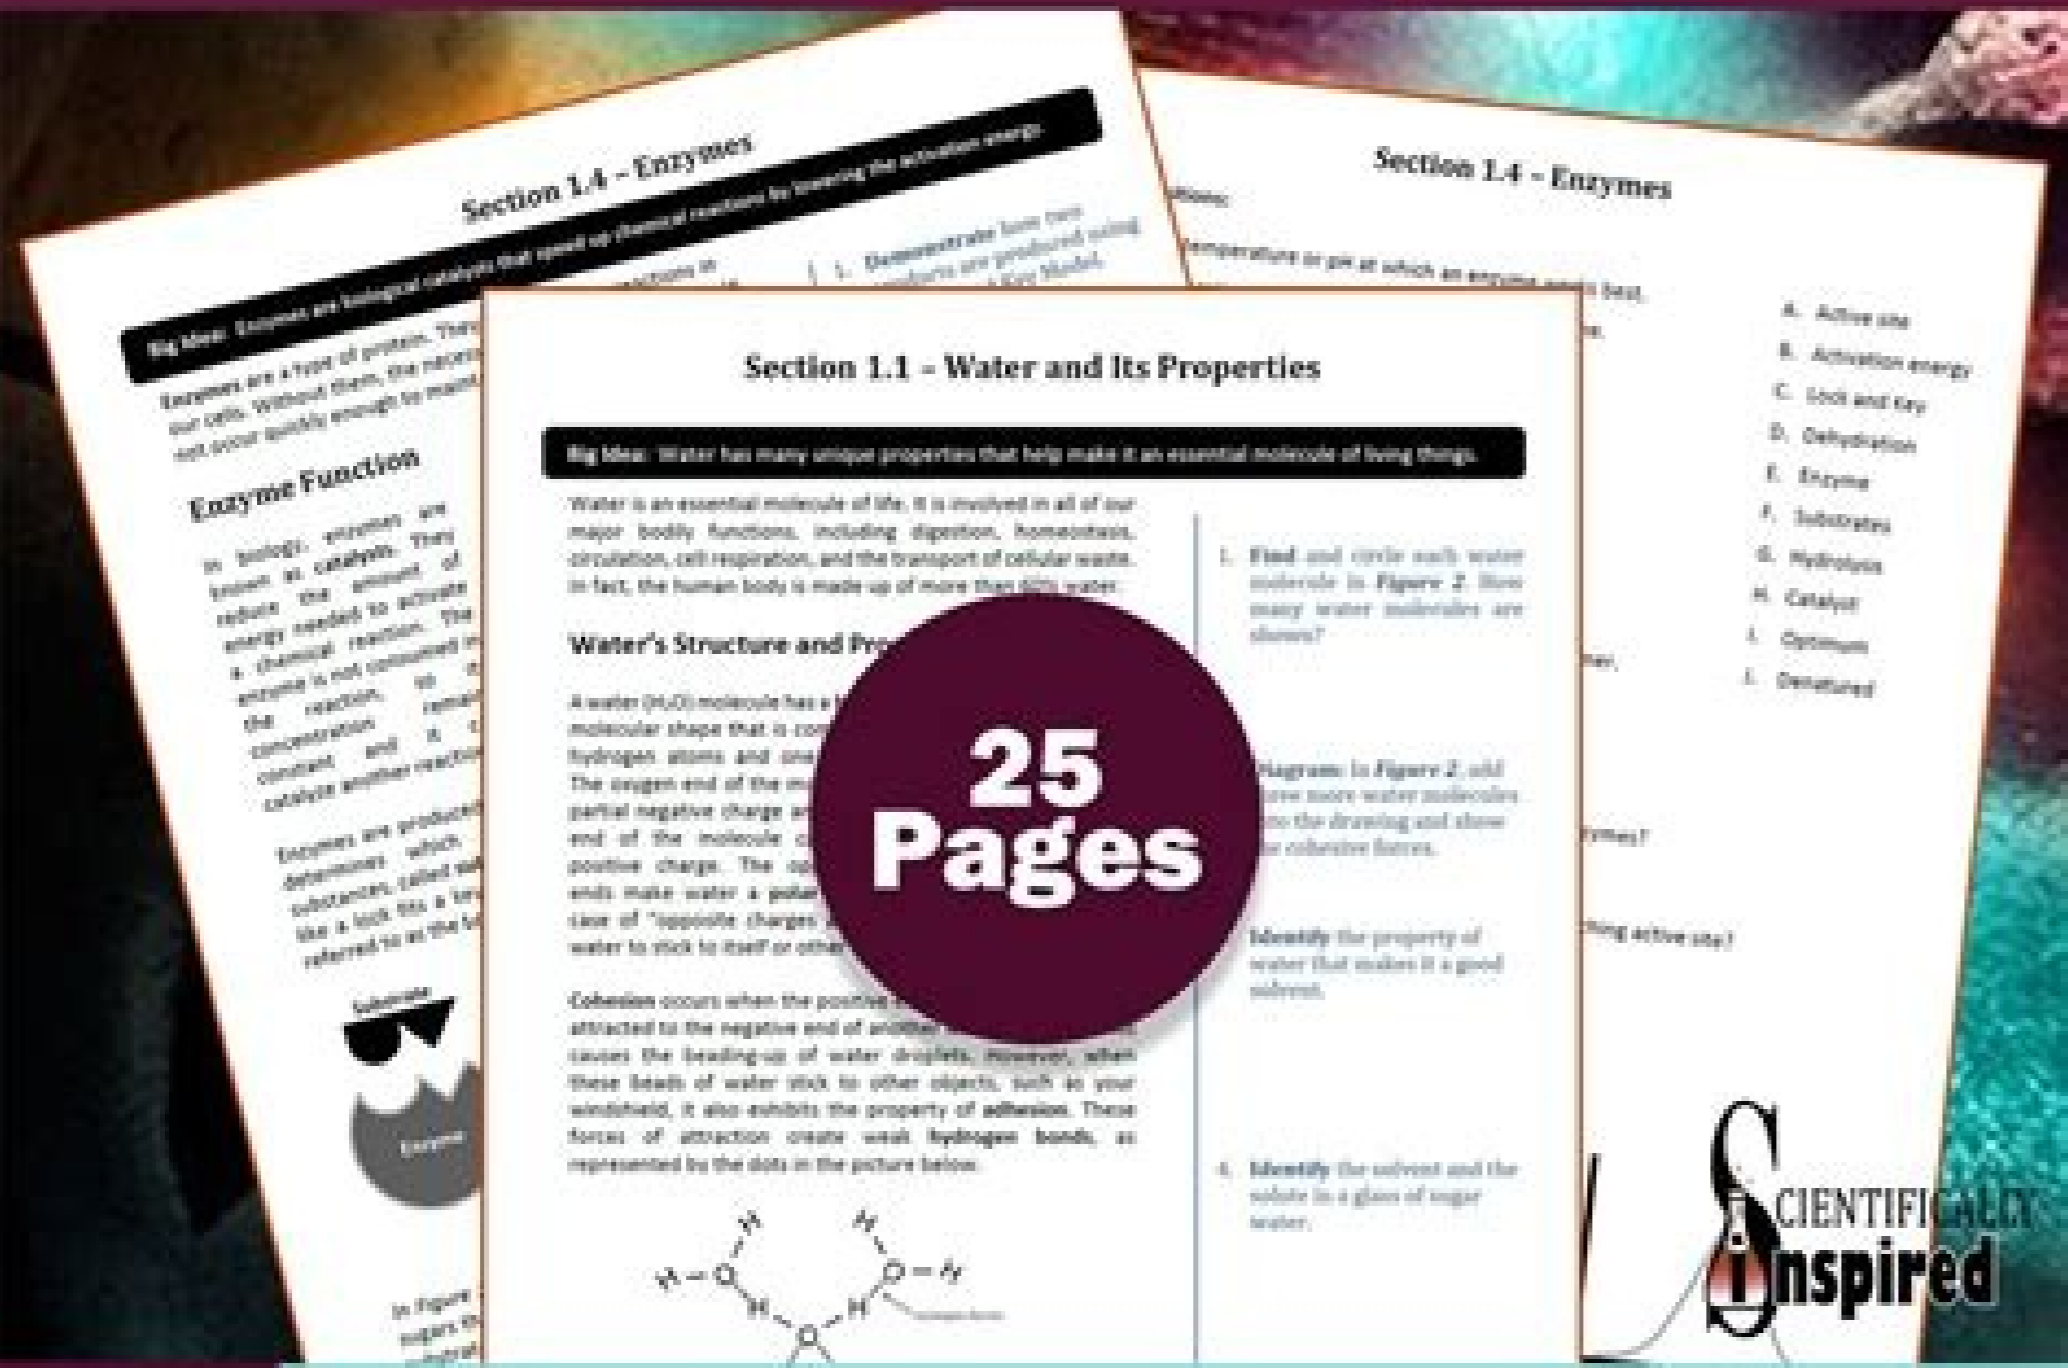

What is the probability of a pink offspring?
 A. 100%
 B. 75%
 C. 50%
 D. 25%

Includes: multiple alleles • incomplete dominance • polygenic traits • codominance • sex-linked traits and punnett squares practice

Active Reading

BUNDLE: Chemistry of Life

Includes: reading comprehension sidebar questions • lesson review • essay questions • answer key with teacher markups

Mitosis worksheet biology. Mitosis worksheet high school. Mitosis worksheet biology answers.

Equatorial plateThe structure of the chromosome that holds the sister chromatids together. InterphaseDuring metaphase, chromosomes line up along this part of the middle of the cell. Puedes encontrar más información y cambiar tus preferencias aquí Name: _____ MITOSIS WORKSHEET1. Interphase (Synthesis)The phase of mitosis in which daughter chromosomes begin to separate. These short answer problems are suitable to use for grade 10 science tests or quizzes. They have been checked for mistakes and typos! Curated and Reviewed by Lesson Planet: Curated OER Educator Rating In this biology worksheet, students identify and locate various vocabulary terms related to the process of mitosis. The crossword puzzles are: 1) Cell Structure and Function (centrioles, cytoskeleton, peroxisomes, prokaryotes, Golgi, eukaryotes, mitochondria, chloroplast, rough/smooth endoplasmic reticulum, vacuole, cytosol, ribosomes, phospholipids, nucleolus, cytoplasm, cell wall, plasma membrane, lysosomes) 2) Cell Transport (exocytosis, facilitated dif This product contains 33 pages of short answer question on the biology unit of grade 10 science. CelluloseThe stage of the cell cycle in which DNA is duplicated/replicated. The topics include cell theory, cell organelles, cell division, the cell cycle, mitochondria, cytoplasm, cell membrane, cell wall, golgi body, vacuole, nucleus, nucleolus, smooth endoplasmic reticulum, rough endoplasmic reticulum, lysosomes, chloroplasts, plant cells, animal cells, chromosomes, centromere, centrioles, chromatids, prophase, metaphase, anaphase, cytokinesis, interphase, mitosis, tumors, cancer, bacterial cells, prokaryotic cells, eukaryotic cells, tissues, organs, organ systems, epithelial tissue, muscle tissue, nerve tissue, connective tissue, digestive system, pancreas, liver, gall bladder, epiglottis, larynx, stomach, respiratory system, nostrils, mouth, lungs, cilia, bronchi, trachea, alveoli, circulatory system, heart, aorta, ventricle, vein, arteries, capillaries, skeletal system, muscle, bones, tendons, ligaments, cartilage, epidermis, nerves, nervous system, palisade tissue, spongy mesophyll, xylem, root cap, vascular tissue, osmosis, diffusion, transpiration, flowers, fruit, ovary, stamen, pistil, sepal, petals, anther and filament. PerfecPage 4The end of the year is quickly approaching. More engaging than a traditional worksheet. You may use the same term more than once.STATEMENT/DESCRIPTION TERM/STRUCTUREThe name of the attachment point for the spindle fibres on the centromere region of the chromosome. CentromereThe name for the star-like appearance that forms from the centrioles as spindle fibres radiate out from the centrosome.Asters The structure that forms in plant cell mitosis to serve as a scaffold for the cell plate during cell wall formation.Phragmoplast short set of microtubules The stage of the cell cycle of animal cells in which the cleavage furrow divides the cell into two new daughter cells.CytokinesisThese paired structures are found in the centrosomes in animal cells. CentriolesThis material is brought to the cell plate in vesicles in order to build the cell wall. Kinetochores Cells spend 90% of their time in this stage of the cell cycle. Help them remember and review key vocabulary. Save time and discover engaging curriculum for your classroom. Fill in the correct term or structure for each of the following statements/descriptions. Keywords: science, biology, life science, RNA, ribose, thymine, hypotonic, hypertonic, solution, solute, concentration, homeostasis, nucleus, photosynthesis, cell membrane, cell wall, prokaryotes, eukaryotes, eukarya, domain, rPage 5These biology crosswords make wonderful vocabulary reviews for high school students. Check out the preview for a complete view of the resource. Use this maze worksheet for reviewing or assessing your students' understanding of basic genetics concepts including DNA structure, RNA, replication, protein synthesis, reproduction, cell division, heredity, and biotechnology. Cytokinesis All the multiple choice questions, short answer questions, Power Points, worksheets, quizzes, labs and tests that I post are properly formatted and ready to print. This pack consists of five crossword puzzles, plus an answer key. Assign the worksheet for homework, an in class activity, or even as an emergency sub plan. Now, it is time to review! Use this puzzle, along with the other Biology Review Crossword Puzzles as an in class or homework assignment that your students won't mind doing. Reviewed and rated by trusted, credentialed teachers. Terms included in this word search are: embryo, development, fertilization, cleavage, patterning, organogenesis, sexual reproduction, vegetal pole, animal pole, multicellularity, proliferation, mitosis, morula, apoptosis, blastula, morphogenesis, induction, differentiation, gastrulation, ectoderm, endoderm, mesoderm, deuterostome, and protostome.Fun game to learn about and review terms associated with embryological development. Keywords: science, biology, life science, DNA, adenine, guanine, cytosinPage 2Enjoy this mitosis word search with your students! Find 20 terms horizontally, vertically and diagonally. All short answer questions are in 12 font, times new roman, without text boxes and condensed into the least amount of space possible. AnaphaseThe stage of the cell cycle of plant cells in which the cell wall is formed. Identify each of the following phase of mitosis:DIAGRAM OF PHASE OF MITOSISNAME OF PHASE OF MITOSISORDER OF PHASES (1 TO 4)Anaphase 3Metaphase 2Telophase 4Prophase 12. The short answer questions already have the marks assigned and have been separated into knowledge, application, thinking and communication questions. Try It Free Esta web utiliza cookies Nuestros y nuestros socios publicitarios utilizamos cookies y otras tecnologías de seguimiento para facilitar una mejor experiencia de navegación, para mostrar contenido y anuncios personalizados, para analizar el tráfico del sitio web y para comprender de donde provienen nuestros visitantes. There are 19 biology terms located in the word search. Terms include mitosis, prophase, cytokinesis, anaphase, interphase, metaphase, telophase, asexual reproduction, identical, daughter, cells, spindle fibers, chromatin, chromosome, DNA, centrioles, nucleus, chromatids and sister cells.Answer key included.**DOWNLOAD PDF TO PRINT FOR USE IN PERSON OR ASSIGN DIGITALLY TO GOOGLE CLASSROOM** Students can digitally highlight or draw circles arouPage 3Embryological development themed word search with answer key.
