Android phone games 2019

2019 is coming to a close and that means that it's time to give a good, hard look at the best hand games of the year. We have a fairly varied list reduced from a possible 120 candidates that we covered over the period of the year. This year too, mobile games are rather unique in that most games are from popular studios or franchises. Don't worry, man, because the segment of indie games also saw some great launches this year. Frankly, this is probably the best year we've had yet for hand games and this list reflects that. Here are 2019's best Android games!

Ailment is a pixel-art action game that many of our readers enjoyed this year. The game too has rogue elements, a top-down shooting style similar to the old Contra games, and a ton of things to do. There's a lot of weapons to collect and some little beauties like eggs hidden from Easter and the ability to bring an NPC along with you. The game is free to play with an ad-free premium version if you wish. If not, you just have to watch dwarves if you want to revive your character. We feel like it's a coma. **Righteous out** and that makes Ailment a very good free game for those in an oration. Another den is a free mobile gacha game. He received a lot of press because some members of the original team Chrono Trigger also worked on this game. There are tons of odes for Chrono Trigger too, especially at the opening of the game. In any case, this is different from the free majority to play mobile RPGs. It does not have a complicated menu system and instead follows a rather linear story. The gacha elements remain in the background at all times and there are long stretches where it feels like a JRPG console. We wanted the combat system to be a bit more granular and we wanted the cloud savings system to be better. Hello, I'm sorry. **Dota Underlords** has a fascinating story. The type of game As a mod and eventually evolved to his own game. Dota! **Sirs** are that game. The Mobile Version has crossplay crossplay The PC version also so you can switch forward and back as needed.

Some other features of the game include offline play with AI, ranked match, seasonal rotations and more. The game's mechanical is primarily strategy, although all the strategy of the world will not fix it if the randomness of the game decides to manifest you. In any case, it is a free game, the emblematic title in the auto battler (or auto chess). The older rollers: the mines are a Bethesda RPG. It gives you the game of older classics rollers, but on a smaller scale. Players go on missions, rebuild a city and fight with various types of bandits. You keep leveling and building the city as you progress. The game also includes an online PVP mode for competitive players per year. The mines have their ups and downs, depending on the current stunner, but people usually seem to really like it. It is also available on Nintendo's switch and we really recommend there on the mobile if you have both platforms. **The Escapists 2**: Pocket Breakout is next game in the popular franchise. It's a SIM-style game where you get out of prison. Players have to do all the prisoner's things as usual, but compete and enact a plan to escape the prison in the background. It involves a lot of juggling things around and the game includes a craft system to make your various tools. The second iteration of the game includes more arrests, including women's prisons along with various challenges and multiplayer support. It is run for a flat fee of \$6.99 without in-app purchases or ads. **Grand Mountain Adventure** is a gentle and gorgeous ski game and ticks many right boxes. The game includes offline playback support, no payment methods to win, a decent amount of content in the free version and little extras like hidden parts and tricks. You start by the mountain, avoiding obstacles and performing tricks. However, the main draw of the game is its quiet behavior and andmechanical. This is one of these games that is just fun and comfortable to play. The free version of the game gives you a mountain and the premium version unlocks the rest of the mountains. There are no announcements in this game and that includes the free version. Prepare: free to play / \$ 4.99 per month **Mario Kart Tour** was the great launch of Nintendo for 2019. Although not well received by media, he had the first week more successful in the history of mobile games with 90 Millions of Downloads To Call of Duty: Mobile took the crown a few weeks later. The mobile pilot has most of the same mechanics than other mobile pilots. However, there are pieces of Mario Kart Flair. For example, you can get impulses by turning and, of course, the various race destruction weapons are also available. A big problem of Nintendo is your super expensive micro-transactions and signature level. However, these are the kinds of things that Nintendo can fix so that we can keep hoping that this game cleans your micro-transactions. **Dr. Mario World** was another great launch of Nintendo and is a decent game of three puzzle games. **Minecraft Earth** is not technically all the way out yet, but we think it is quite safe to put it here anyway. The Beta is public access so that almost no one can play it now. This is an air game similar to those seen as **Pokemon Go**, but this time with a minecraft turning to it. Players can build things anywhere such as Minecraft and other players can also interact with it. Players can build whatever they want and all this adds to the landscape of the game to other players to explore later. Some of the air mechanics need work and some general polish is necessary, but the game is still in beta, so it is not really fair to make the complete trial still. That said, it's good enough now to be here. **PREACE: Free Test / \$ 4.49** **Oddmar** is one from the same developer of Leo's fortune. The game has many of the same elements that made Leo's fortune have fun.

OThey are very good, the controls are also very good, and there is a narrative story to keep the player engaged. You play as Oddmar, a dishonored Viking looking to make a name for himself. The game includes 24-level Google Play Games Saving Cloud, hardware controller support. It run by a single price without additional micro-transactions. It won't blow your socks, but it's a general showing and an easy choice for the best of 2019. The PPKP is a fun arcade action game with the best "in" the mechanical. Players walk around the players who pierce the bad guys, gaining new ones, learning new skills, and collecting materials for additional upgrades. It's strongly reminiscent of the 90-year-old Arcade Games, but not exactly the same. In any case, the game is simple with good controls and smooth play. He's one of the truly excellent killers of 2019. Rebel Inc is the intensely popular pest and by the same creator. Rebel Inc is a simulation game where you try to stabilize seven unruly regions with problems. Players amuse various initiatives, take out rebel insurgents, and use their resources wisely to cool the unrest. The creators wanted to use the largest possible number of real-world events without using real-world lights. Given that the Disease Control Center once asked these people to talk about their Game of Plague Inc, we are sure that they did their research for this as well.m. Price: \$9.99 + \$4.99 + \$4.99Rome: Total War is one of those games that came out during the last two weeks of 2018 and didn't make our list last year. If left alone, we probably don't include it here. However, 2019 saw two expansions to the main game, including Rome: Total war - Alexandria and Rome: Total war - Barbaros. Each auto-noun DLC has specific hyperam trees revolving around prominent moments in the And each one performs so well as the main game. You're just looking at \$ 20 20 all three sets, but these were, without in dare, the best premium games of 2019. Price: Free / \$10.99 per monthRuneScape Mobile is official RuneScape customer for Android. RuneScape is an older but still popular MMORPG with an absolute ton of content. You join in, create a character, and start your adventure. The grains are just ok because it's an older game, but the controls are supwhere and youyouyouyouyouyouyounta nta nta nta nta have things to do for a long time. It also supports cross-play with the PC version and you can easily switch between the two. In addition this is a style of MMO subscription so you don't have to worry about the game breaking microtransactions like most mobile MMORPGs. The game is still in beta and we expect many of the clumsy elements to be polished over time. Stardew Valley was our favorite for the best Android game of 2019 until Call of Duty: Mobile came out. However, it still deserves the distinction of being the best premium game of 2019. It is a farm yes with a little things to do. Players start planting crops and raising cattle and eventually grow up doing other things like fishing and participating in local events. You can even settle down and marry someone you want. The game is and varied with a ton of things to really do. In addition, it gets everything from top to bottom, including controls, gaming me, and even even the grains are pleasant. It was the best Android game of 2019 for months until Call of Duty: Mobile stole the crown. There are times when these decisions are made by us and this is of those moments. Call of Duty: Mobile hit the Google Play Store like a freight train. The game has racked up hundreds of million downloads and over a million reviews on Google Play alone in just one week. We haven't seen this kind of popularity in a since Pokemon Go. The game has a variety of game modes, including the game mode of the popular zombies, along with a real battle of one hundred players players To the Fortitude and the BFF. Hello. Besides, there's a variety of unlocked things and only one tonne a hand. Three things to do. This is easily one of the deepest online PvP shooters in the history of mobile games and definitely had more impact on 2019 than any other mobile game. We'd like that too. m giving a special shout to the Brawl Stars. The game came out right after our list last year, but it wasn't late enough not to make the list this year. It deserved to be in the best of 2018 or in the best of 2019, but it was just launched during that week where it made no sense to add it to either. Blackmoor 2 is A game of platforms with a fun story, a way of building to their own, multi-player co-op, and online PvP. Brown Dust This game is a strata RPG is gia above the mother day with elements gacha. We loved your gacha system guaranteed where to get something good after so many random summonings. Despotism 3k-AI enslaved humanity and now runs machines with human power. It is scary, difficult and fun, even if it becomes repetitive after some time. Doom I and II The FPS games that officially started all this in 2019 on telematics. The ports are just fine. However, they are improving with each update. The Eyes of Ara: A similar game of adventure-puzzle in mechanically similar to Myst. Gorgeous graphics, fun puzzles, and the peculiar style make it a general entertaining title. POP Gears! This has a lot of potential as an action-arched battle game. However, we felt this could have been better, so we left it outside our top 15. Gorogo is An excellent (though very short) puzzles with excellent works of art, a good narrative, and a fun head-breaker mechanic. Harry Potter: Wizards Unite to Niantic big release this year was Pokemon Go, but with Harry Potter instead. We hope it will improve over time. Human: East Flat is an arcade game goofy and fun with a similar style (but execution very different) to games like the Little Bit Planet. Items a little bit But seriously funny to play. LANGRISSER is A mobile strategy RPG with Gacha elements. It takes places in the Langrissier universe and has excellent art and music. SA is Rie Layton - Level-5 ports of the acclaimed games by Nintendo DS are a bit of guilty pleasure for me. The ports are fantastic, if a bit pricey. Tony Hawk is s skateboarding Jam is "Tony Hawk returns to the game with this skateboard game. He plays a lot like ancient console games Tony Hawk, but had many insects to break the top 15. Tropic is The is a construction simulator of the city where you take control of a Caribbean island of your ex Terrible dictator and build it back. Whispers of a Machine is "A retro style enir-style adventure game with real dubbing, a deep story and some fun turnarounds. This was our 16th choice and just did not make the list complete. Witcheye is "Witcheye is an old platform with a fun premise and some unique mechanics. We think it should be more popular than it is. %.
