Come and explore, share and make your next project with us! Robert Pepper uses Windows 8.1. He asked if you need to obtain the update, and how to do it.IÃ ¢ d have a hard time coming up with the most ridiculous label of a Windows 8.1. Update. A things would be much less confusing if Microsoft had called this just one of the Windows 8.1 as user interface improvements, is another good step. [You have a question of technology? Ask PCWorld Contributing Editor Lincoln Spector. The supplier answer@pcworld.com]. But you have to get this update for this particular update and lower case for upgrades in general). If you & Windows 8.1 installed, it does. This month, Microsoft will stop providing security patches to Windows 8.1 installations without upgrading. This version will cease to be safe.Oddly, Microsoft will continue to patch (not 0.1) Windows 8.1 installations without the update, you Wona t.But thata ¢ s fine with me, because I © likes this. The differences are striking between the traditional Windows programs and Metro / Modern apps are always smoothed. New applications also appear on the Home screen. Overall, ITA's a significant improvement. So how do you get the update? You might already have it. To find out, check the top right corner of the Start screen. If you see a magnifying glass icon next to your name to access, you ¢ ve got the upgrade. (You could also see the power icon, but the magnifying glass will surely be there.) If you donât see, go to the Search charm, update to the Windows type and select Windows Update. Click the link that tells you that a number of important updates are available. Look for a Windows 8.1 update (KB2919355). A probably will be selected. Check and start the update. It will want a bit 'of time, but the wait will be worth it. Inside, Windows 8 is superior to Windows 7A ¢ faster and reliable. And slowly but surely, Microsoft is fixing the problemsà ¢ really terrible user interface, although the company canâ t figure out how to name these improvements .. Note: When you buy something after clicking links in our articles, you can earn a small commission. Read our affiliate link policy for more details. Last Updated: August 24, 2021 at 16:23 + 02: 00AFTER Unrolled the security update August 2021 to the Galaxy A02S, Galaxy A10, A20 Galaxy A31, A50, Galaxy and the Galaxy M31S. The latest security update is currently launching in India, but we expect to expand to other markets Soon. The Galaxy M31S started receiving a new software update with the M317FXXU3CUH2 firmware version. In addition to fixing 40 privacy and security relative securi manually by browsing to Settings »Software Update and touching the firmware from our database. However, to do this, you need to be lived with the flashing firmware and having a Windows Handy.samsung PC had launched the Galaxy M31S in August 2020 with a 2.5 UI 2.5-based UI 2.5. The smartphone received UI 3.0 Android 11 update based on the beginning of this year and UI 3.1 update a short time after. Samsung now allows you to increase the RAM on your phone!
