Allows applications to connect to paired bluetooth devices. Allows applications to discover and pair bluetooth devices. Allows applications to open network sockets. Allows applications to access information about networks. Allows using PowerManager WakeLocks to keep processor from sleeping or screen from dimming. Allows applications to access information about Wi-Fi networks. Allows an application to receive the ACTION_BOOT_COMPLETED that is broadcast after the system finishes booting. LOCATION: Allows an app to access precise location. Allows an app to access approximate location. STORAGE: Allows an application to read from external storage. Allows an application to write to external storage. CONTACTS: Allows access to the list of accounts in the Accounts Service. Allows an application to read the user's contacts data. CAMERA: Required to be able to access the camera device. Min Sdk 23 Min Sdk Android 6.0 (M) Target Sdk 30 Janelas múltiplas No Suporta telas small, normal, large, xlarge Cpu arm64-v8a armeabi-v7a Open Gl Int 0 Suporta qualquer densidade Yes Densidades 120, 160, 240, 320, 480, 640, 65534, 65535 Uses Características Wi-Fi hardware features: The app uses 802.11 networking (Wi-Fi) features on the device. Uses Not Características Camera hardware features: The app uses the device's back-facing camera. Devices with only a front-facing camera do not list this feature, so use the android.hardware.camera.any feature instead if your app can communicate with any camera, regardless of which direction the camera faces. The app uses the autofocus feature that the device's camera supports. The app uses the device's front-facing camera. Uses implied Características The app uses the device's Bluetooth features, usually to communicate with other Bluetooth-enabled devices. #The app uses coarse location coordinates obtained from a network-based geolocation system supported on the device. #The app requires the device to use the portrait or landscape orientation. If your app supports both orientations, then you don't need to declare either feature. #The app uses 802.11 networking (Wi-Fi) features on the device. #5B40CA111A6193A139F59FE99416A02 Assinatura 69FFD0B740730C71E1A5F0C02B4CE016AAB92E51 Sha256 E601D7E0383F0CC1E0F0A4243394E42CAFBA6E7CEDF1AF377F9052C3A00A46A4 Valido de Sat Jan 04 15:27:04 CET 2020 until: Wed May 22 16:27:04 CEST 2047 Número de série 334cf4e1 Desenvolvedora hela Ou uw Organização uw Localidade uw País uw Cidade uw 0.243.2 276.44 MB / 100,000,000 Downloads / Sep 12, 2022 Pokémon GO is a multiplayer project that literally from the first days of its appearance on the network has captured a multi-million audience of players with its unusual gameplay and even the very idea. The game offers to gather a collection of legendary Pokémon creatures. Train these monsters and send them to fight rival Pokémon on arena. Nevertheless, most of the time, the player have to look for animals on the streets, in parks, buildings and other public spaces. Searches require the use of your smartphone with turned on geolocation function and access the network. In addition, if you love projects with a big name, then we have prepared for you Sonic the Hedgehog™ Classic and Dead Cells. DOWNLOAD MOD APK Overall Info Category Adventure Developer Niantic, Inc. Version 0.247.1 Size 109 Mb MOD Info Fake GPS Requires Android 6.0+ Features Pokémon GO appeared thanks to development company Niantic in 2016. To date, the game boasts over 100 million downloads and a 4.1 point rating. Very first steps After downloading the game to your device, you have to register on the official website. Moreover, only players over 16 years old can do this, while younger gamers have to confirm registration through their parents. First, the player needs to create an avatar so that other players could know about an upcoming opponent. Only after all these actions, you can go hunting. We recommend hunting on the streets, in parks and near water. In a word, it is great option to explore the world around you using the game augmented reality. The subtleties of fishing Using the smartphone camera, player of Pokémon GO needs to study the area if there is a signal of one of the game characters hiding. Noticing a monster on the screen, you need to throw a pokeball at him by means of a swipe movement. In this case, it is necessary to monitor the distance traveled. The longer it is, the stronger the Pokémon becomes and the more difficult it is to catch it. At the first levels, the hunt is quite simple, and you can replenish your collection albeit quickly. However, it won't include the most powerful creatures. The more the player's level rises, the more powerful Pokémon come across. Grow monsters in your own incubator to replenish collection, but you still have to look for eggs in real world. Leveling and training After reaching a certain level in Pokémon GO, the player has the opportunity to visit a gym or training base, where creatures can increase its experience and become more powerful. Team battles also take place in the training room. Therefore, you can witness not only fighting abilities of your monsters but also its transformation into other types. Graphics and Sound The creators of Pokémon GO managed to create a graphical model that combines real and fictional reality. Undoubtedly, the game graphics require quite powerful devices. However, creators thought about this and created a highly customizable graphical menu where you can change many parameters for the individual characteristics of every device. As for the graphic design, the game is very modern and can boast of well-drawn characters and locations. The sound design is quite realistic and becomes a good complement for the whole gameplay. Mod Description Weather conditions in many parts of the world do not allow being outdoors for a long time for most of the year. This is a big obstacle for some gamers. Let's not forget about coronavirus pandemic, which has locked many people in their homes. However, we offer to solve this problem by installing a mod for Pokémon GO with hacked radar and fake GPS. These functions allow you not to leave the house at all. Moreover, you will be happy to catch the game characters and find needed items for their treatment and upgrading while staying at home. Mod Testing We have tested the modified version of Pokémon GO on our devices in order to make our impression for website visitors. We can confirm mod functionality with a hacked radar and fake GPS. Now, you can change your location and collect Pokémon right at home, which is very convenient during a pandemic, bad weather, or simply if you are an introvert. Installation file is safe for you and your device. You won't experience any problems while using it. In addition to the installation game file, you must download Fake GPS Joystick & Routes Go to use the hacked radar and fake GPS. Only by pre-installing and running it can you change the location directly for playing Pokémon Go. Please note that you can get a ban from developers for changing geolocations. That is why we recommend you only to change your location near your real one. The game requires the player to move around the real world a lot. This is why the game is interesting to most users. It provides you with ability to connect real and virtual world! Still, main goal is to find and catch Pokémon. The higher the player's level, the more difficult it is to search for rare or strong monsters. The gameplay is intuitive. Moreover, there are tips for novice players that help to understand all the intricacies. Our Summary Pokémon GO is a new word not only in mobile games, but also in combining entertainment, real life and computer reality. This exciting adventure connects together a huge number of players from all over the world! How to install Pokémon GO Mod APK? Go to download page and get the latest app version. Open file manager and launch pokemon-go-technifiser.com.apk. Switch on "Allow from this source" tab in device settings in case of installing APK file for the first time. Complete installation process following tips on the screen. DOWNLOAD MOD APK Skip to content PokémonGoApk LINK HERE >>> - When you first play Pokémon GO, you'll get to customize your Trainer, choosing apparel and accessories to give them a cool look. Your customized Trainer will appear as you move around on the map and on your profile page. Other players will also see your Trainer when they visit a Gym you control or when you interact as friends (see below). Blocky TowerDarekCCCTarget of this game is to stack tetris-like blocks as long as you can. Game ends if one of blocks fall down. No more rules. Game is using KaboomJS with MatterJS. Created for #kenneyjam.FendorealnoncladDevShare, create, discuss AI-generated images on the stable diffusion engine! Let's make this the most-liked repl ever ©
