Xiaomi Miui is known for its Adware software and several system applications are delivered with integrated advertisements. This advertisement is seen by many users and this advertisement does not seem to do it correctly after paying the high price for the smartphone. In the past, many users have complained of unfair advertising practices and Hellip; 2020-06-29 21: 022020-06-29 21: 0250 Disable MIUI 12 advertisements with a single switch! //S3B.Cashify.in/gPro/uploads/2020/06/26000914/how-disable-ds-miui-hree-steps.jpg1230900 Xiaomi is one of the largest smartphones manufacturers in the world, in particular in the segment budgetary. The brand sells millions of smartphones each year and is well known for the performance of smartphones themselves at low prices. In recent years, Xiaomi has aroused a lot of disinterest in users due to the advertisements displayed on the software system interface. Unfortunately, it was a quick trend that other manufacturers of low -budget smartphones have also taken up and we sometimes see other brands in system applications such as realm advertisements. Also read: IOS 13 most common problems - how to solve them! The advertisements are common in Miui, they are intrusive and affect the user experience. In the past, there were even users who remained away from Xiaomi phones, but it seems that Xiaomi will not stop advertising because this makes it the main source of profit from Xiaomi. After Xiaomi announced that it would limit its equipment based on equipment to only 5 %, the company is forced to earn the rest of its money from another source. The company previously announced that advertisements in Miui would be limited, in particular those inappropriate. Finally, we can see how Miui 12 will get rid of these advertisements and the latest version of Miui 12 will only have the possibility of deactivating it. Read also: Mobile phones with the best display How to delete MIUI screens with a single switch in previous MIUI versions, the removal of advertisements was a very long process where you had to travel several menus to find the right options. The process is now very simplified and users can deactivate them in just three steps. Read also: What is Google Assistant? What does it simplify our lives! To delete the displays in MIUI 12, open the Settings page, then click the account option Find the data protection directive, press it and click, searchAdvertisement In the "Data Protection Directive" tab "" Turn off the option to deactivate all system displays after performing the above steps, displays are no longer displayed throughout the system user interface. In previous versions of MIUI, you will have to mark the impression from the user, describe from the transmission of diagnostic data and deactivate the custom content settings in all MI applications. Fortunately, all of these steps are no longer necessary and you can simply follow three steps to complete the job. On Xiaomi devices, you can also remove installed page software and deactivate advertising. This reduces the number of unwanted program alerts.
